curators have made to document the work of AIDS activism in the United States and the infrastructure developed to maintain it safeguarding the material for future generations to remember these social movements and to revitalize the epidemic's past in order to remake the present and future of AIDS Drawing on large institutional archives such as the New York Public Library as well as those developed by small community based organizations this work of archival ethnography details how contemporary activists artists and curators use these records to build on the cultural legacy of AIDS activism to challenge the conditions of injustice that continue to undergird current AIDS crises Cifor analyzes the various power structures through which these archives are mediated demonstrating how ideology shapes the nature of archival material and how it is accessed and used Positioning vital nostalgia as both a critical faculty and a generative practice this book explores the act of saving this activist past and reanimating it in the digital age While many books popular films and major exhibitions have contributed to a necessary awareness of HIV and AIDS activism *Viral Cultures* provides a crucial missing link by highlighting the powerful role of archives in making those cultural moments possible

Oncogenes Kathy B. Burck, Edison T. Liu, James W. Larrick, 2012-12-06 Cancer viruses have played a paradoxical role in the history of cancer research Discovered in 1911 by Peyton Rous 1 at the Rockefeller Institute they were largely ignored for several decades Witness his eventual recognition for a Nobel Prize but not until 1966 setting an all time record for latency and testimony to one more advantage of longevity In the 1950s another Rockefeller Nobel laureate Wendell Stanley spearheaded a campaign to focus attention on viruses as etiological agents in cancer his platform having been the chemical characterization of the tobacco mosaic virus as a pure protein correction ribonucleoprotein in 1935 2 This doctrine was a centerpiece of the U S National Cancer Crusade of 1971 if human cancers were caused by viruses the central task was to isolate them and prepare vaccines for immunization At that point many observers felt that perhaps too much attention was being devoted to cancer viruses It was problematic whether viruses played an etiological role in more than a handful of human cancers
