Web Cartography Jan-Menno Kraak, Allan Brown, 2003-09-02. Maps and atlases are created as soon as information on our geography has been clarified. They are used to find directions or to get insight into spatial relations. They are produced and used both on paper as well as on screen. The Web is the new medium for spreading and using maps. This book explains the benefits of this medium from the perspective.

Microsoft Flight Simulator X For Pilots Jeff Van West, Kevin Lane-Cummings, 2012-02-15. Get ready to take flight as two certified flight instructors guide you through the pilot ratings as it is done in the real world starting with Sport Pilot training then Private Pilot followed by the Instrument Rating, Commercial Pilot and Air Transport Pilot. They cover the skills of flight, how to master Flight Simulator and how to use the software as a learning tool towards your pilot's license. More advanced topics demonstrate how Flight Simulator X can be used as a continuing learning tool and how to simulate real world emergencies.

Data Visualization in Society Martin Engeström, Helen Kennedy, 2025-10-01. Today we are witnessing an increased use of data visualization in society. Across domains such as work, education and the news, various forms of graphs, charts and maps are used to explain, convince and tell stories. In an era in which more and more data are produced and circulated digitally and digital tools make visualization production increasingly accessible, it is important to study the conditions under which such visual texts are generated, disseminated and thought to be of societal benefit. This book is a contribution to the multi-disciplined and multi-faceted conversation concerning the forms, uses and roles of data visualization in society. Do data visualizations do good or bad? Do they promote understanding and engagement or do they do ideological work privileging certain views of the world over others? The contributions in the book engage with these core questions from a range of disciplinary perspectives.

Science in the Met Office Great Britain: Parliament: House of Commons: Science and Technology Committee,2012-02-21 The Met Office currently operates as a Trading Fund within the Department of Business Innovation and Skills BIS The Committee welcomes the move to BIS particularly given the potential for closer links with the research base and the opportunity to develop further its commercial activities Core services though for the public service must be maintained The Met Office generates a significant proportion of its revenues from Government contracts and Customer Service Agreements in addition to its commercial services and the Government should provide clearly defined funding commitments This would allow the Met Office to take a longer term perspective on scientific and operational development The Government has no plans to privatise the Met Office which the Committee saw as putting at risk the strong partnerships

built with international partners and the sharing of crucial meteorological data Also the Committee welcomes the Government's initiative of Public Data Corporation Some concern though is expressed that scientific advances in weather forecasting and the associated public benefits particularly in regard to severe weather warnings are available but are being held back by insufficient supercomputing capacity The Met Office should attempt to streamline the scrutiny of science under one committee and develop a strong customer relationship with key government departments
