Castells The Information Society is an invaluable resource for understanding the nature of the information society as well as the meta processes of neoliberal globalisation and the revolution in information technologies that made it possible Digital Nation Anthony G. Wilhelm, 2006-02-17 The long term social benefits of building an inclusive information society a national action plan As our social institutions migrate into cyberspace the digitally disenfranchised face increasing hardships What happens when in search of quick and cheap fixes a government office shuts down and is replaced by a public Web site What happens when a company accepts only online job applications Inevitably those most in need of the services and opportunities offered are further marginalized In Digital Nation Tony Wilhelm shows us how to build a more inclusive information society offering a plan that reaps the benefits offered by the new technology while avoiding the pitfalls of social exclusion Technology he tells us isn't the problem it's the use of technology that can empower or control unite or divide we need to recover the ideas of social justice and fairness that have been lost in the rush to make things faster and cheaper In Wilhelm's vision of an inclusive digital nation everyone can take advantage of the new technology With everyone part of the information society we can revolutionize the way we educate our citizens deliver healthcare and engage in productive work The result will be increased efficiency and productivity that will lead to long term savings of billions of dollars and an enhanced quality of life as technology expands choice and opportunity We can begin to bring this about by expanding access to computers and making it easier to acquire digital literacy skills To do nothing to turn a blind eye to the promise of an inclusive technology would cost us socially and economically Digital Nation's call for action sets the terms for a new debate on bridging the digital divide *Theories of the Information Society* Frank Webster, 2002 In the first edition of *Theories of the Information Society* Frank Webster set out to make sense of the information explosion taking a sceptical look at what thinkers mean when they refer to the information society and critically examining all the major post war theories and approaches to informational development **The Information Society as Post-industrial Society** Yoneji Masuda, 1981 Society to an information Society **Governing Telecommunications and the New Information Society in Europe** Jacint Jordana, 2002-10-29 offers a fresh look at efforts to manage telecommunications and the emerging information society in Europe _ Communication Booknotes Quarterly European countries have recently been involved in an extremely broad set of regulator *The Information Society Reader* Frank Webster, Raimo Blom, 2004 Pulling together contributions to the information society debate from some of the field's key figures this book addresses and examines key topics providing an invaluable resource for students and academics alike **Philosophy of the Information Society** Herbert Hrachovec, Alois Pichler, 2013-05-02 This is the second of two volumes of the proceedings from the 30th International Wittgenstein Symposium in Kirchberg August 2007 It contains selected contributions on the Philosophy of media Philosophy of the Internet on Ethics and the political economy of information society Also included are papers presented in a workshop on electronic philosophy resources and open source open access *Poland and the global information society* Wojciech Cellary, 2002 Law,

Regulation and Governance in the Information Society Maurizio Borghi, Roger Brownsword, 2022-12-30 This edited collection seeks to map the landscape of contemporary informational interests to evaluate a range of recognised and putative rights and wrongs associated with modern information societies and to consider how law regulation and governance should be deployed in response New technologies and new applications constantly disrupt our values our framing of our world and our sense of where we are and who we are In our information societies we entertain mixed hopes and expectations as well as significant fears and concerns At the root of these there are a number of informational interests on the basis of which certain rights are claimed and particular wrongs denounced This book addresses these interests considering them as relating primarily to the integrity of the informational ecosystem to the accessibility accuracy and authenticity of public information and to our individual ability to control the outward and inward flows of information that relates directly to ourselves Covering a wide range of subjects the book's interrogation of our contemporary information society is oriented around two questions first whether the information society in which we live is the kind of society that we think it should be and second if not what we can reasonably expect law regulation and governance to do in providing the basis for improving it This book will be of considerable interest to those working at the intersection of law and technology as well as others concerned with the legal political and social aspects of our information society

The Future of Identity in the Information Society Vashek Matyáš, Simone Fischer-Hübner, Daniel Cvrcek, Petr Švenda, 2009-07-26 What constitutes an identity how do new technologies affect identity how do we manage identities in a globally networked information society The increasing diversity of information and communication technologies and their equally wide range of usage in personal professional and official capacities raise challenging questions of identity in a variety of contexts The aim of the IFIP FIDIS Summer Schools has been to encourage young academic and industry entrants to share their own ideas about privacy and identity management and to build up collegial relationships with others As such the Summer Schools have been introducing participants to the social implications of information technology through the process of informed discussion The 4th International Summer School took place in Brno Czech Republic during September 17 2008 It was organized by IFIP International Federation for Information Processing working groups 9.2 Social Accountability 9.6.11.7 IT Misuse and the Law and 11.6 Identity Management in cooperation with the EU FP6 Network of Excellence FIDIS and Masaryk University in Brno The focus of the event was on security and privacy issues in the Internet environment and aspects of identity management in relation to current and future technologies in a variety of contexts

The Early Information Society Alistair Black, Dave Muddiman, 2016-03-23 Whether termed the network society the knowledge society or the information society it is widely accepted that a new age has dawned unveiled by powerful computer and communication technologies Yet for millennia humans have been recording knowledge and culture engaging in the dissemination and preservation of information In *The Early Information Society* the authors argue for an earlier incarnation of the information age focusing upon the period 1900-1960 In support of this they examine the history and

traditions in Britain of two separate but related information rich occupations information management and information science repositioning their origins before the age of the computer and identifying the forces driving their early development The Early Information Society offers an historical account which questions the novelty of the current information society It will be essential reading for students researchers and practitioners in the library and information science field and for sociologists and historians interested in the information society
