Meyers, Marlene J. Darwin, 2019-12-01 In the continuing quest to turnaround the lowest performing schools rapid and sustainable reform or school turnaround seems most elusive for secondary schools Secondary schools are rife with challenges due to their wide ranging mission and organizational complexity With the continued emphasis on college and career readiness and the vast learning possibilities enhanced by technology our third book in this series Contemporary Perspectives on School Turnaround and Reform focuses on rapid school turnaround and reform in secondary schools In this edited volume researchers and scholars consider the doubly perplexing challenge of school turnaround or the rapid improvement of the lowest performing secondary schools Although there is some evidence that school turnaround policy can impact student achievement scores research across international contexts seldom identifies schools that substantially changed student learning trajectories and sustained them Separately many societies have found improving secondary schools a relatively intractable problem for multiple reasons including school size and complexity the micropolitics of teaching and leading within them and cumulative widening student achievement gaps In combination there are almost no examples of low performing secondary schools turning around The chapters in this book begin to offer some hope about how policymakers practitioners and researchers might begin to reconceptualize how they engage in and undertake the work of rapidly improving low performing secondary schools The authors provide theoretical and conceptual advancements offer lessons learned from both successful and unsuccessful initiatives and address practical issues with potentially accessible ways forward *Empires, Post-Coloniality and Interculturality* Leoncio Vega, 2014-09-24 Empires Post Coloniality and Interculturality The New Challenges for Comparative Education presents some outcomes of the 25th Conference of the Comparative Education Society in Europe CESE held in Salamanca in June 2012 The central aim proposed for the debates of the Conference revolves around an intellectual effort to re think and re direct the scientific discipline of Comparative Education based on the broad cultural trends that influence the internationalization and or globalization of education Reconsidering and or re thinking our discipline involves studying the influence exerted on it by three major international forces First empires not so much in terms of discipline or governance but

more related to cultural technological and knowledge perspectives This area addresses both historical process and contemporary circumstances and is expressed through networks research programs academic reform in universities supported by criteria of governance and efficiency transnational mobility and linguistic monopolies Second it is necessary to re think the influence of post colonialism in educational models and models of citizens education not only from the perspective of their impact on the curricular reorganization of education systems but also of their educational and sociocultural expression Both forms were acclaimed both in the 19th century and the 20th century within different international geographic contexts The third component of the discourse triangle is the reconsideration not only historical of the impact of migratory fluxes or better said of cultural migrations and their relationship with the reordering of curricular and educational processes in both education systems and in the social framework Education is now in a transition from monoculture to multiple cultures in the classroom This publication is structured along four themes that illustrate the academic contributions to the Conference The themes are as follows I From Empires History and Memory Comparative Studies of Education II Learning and Assessment Processes an International Perspective III Transnational Education and Colonial Approach IV International Education Comparative Dimensions **Antarctic Journal of the United States** ,1990

The Politics of Postmodernity Gary Brent Madison,2012-12-06 The Politics of Postmodernity outlines in a clear and coherent manner the implications for political theory that are inherent in philosophical hermeneutics Hermeneutics is not only a general theory of human understanding it is also in terms of its practical consequences a general Theory of Democracy This book demonstrates with reference to current debates how hermeneutical theory provides the ultimate philosophical justification for democratic practice and universal human rights One of the book s most significant features is the way in which it attempts to work through postmodernism and the way in which throughout it shows how hermeneutics while fully a form of postmodern thought is nevertheless distinctive in this regard in eschewing all forms of relativism and in resolutely defending a nonessentialist universalism This book will be of interest to all those concerned with the fate of the core values traditionally defended by philosophy and indeed with the future of philosophy itself after postmodernity **The Oxford Handbook of Stress and Mental Health** Kate L.
