Davis, Morten Kjaerum, Amanda Lyons, 2021-03-26 This important Research Handbook explores the nexus between human rights poverty and inequality as a critical lens for understanding and addressing key challenges of the coming decades including the objectives set out in the Sustainable Development Goals The Research Handbook starts from the premise that poverty is not solely an issue of minimum income and explores the profound ways that deprivation and distributive inequality of power and capability relate to economic social cultural civil and political rights Report on Carcinogens ,2002 Unsustainable Ellen Reese, Juliann Emmons Allison, 2023-08 From famously humble origins in founder Jeff Bezos's garage Amazon has grown to become one of the most successful businesses in history able to deliver virtually anything to virtually anywhere thanks to its vast worldwide network of fulfillment centers Unsustainable looks inside the company's warehouses to reveal that the rise of Amazon and warehousing more generally is made possible by the exploitation of workers labor and communities resources including the natural environment Juliann Emmons Allison and Ellen Reese expose the real world repercussions of these pernicious practices through a chilling case study of the socioeconomic and environmental harms associated with the largely unchecked growth of warehousing within Inland Southern California one of the nation's largest logistics hubs where Amazon is the largest private sector employer Tracing the rise of grassroots resistance to Amazon and the warehouse industry by workers and communities across this region the country and the globe Unsustainable provides fresh insight into one of the most important and far reaching struggles of our time *Coconino, Kaibab, and Prescott National Forests (N.F.), Integrated Treatment of Noxious and Invasive Weeds* ,2005 Report of Proceedings - National Academy of Sciences National Academy of Sciences (U.S.),1939 *New Technologies and the Law of Armed Conflict* Hitoshi Nasu, Robert McLaughlin, 2013-12-23 Modern technological development has been both rapid and fundamentally transformative of the means and methods of warfare and of the broader environment in which warfare is conducted In many cases technological development has been stimulated by and dedicated to addressing military requirements On other occasions technological developments outside the military sphere affect or inform the conduct of warfare and military expectations The introduction of new technologies such as information technology space technologies nanotechnology and robotic technologies into our civil life and into warfare is expected to influence the application and interpretation of the existing rules of the law of armed conflict In this book scholars and practitioners working in the fields critically examine the potential legal challenges arising from the use of new technologies and future directions of legal development in light of the specific characteristics and challenges each technology presents with regard to foreseeable humanitarian impacts upon the battlespace *Annual Report - National Academy of Sciences* National Academy of Sciences (U.S.),1937 Vols for include reports for the National Research Council 1965 66 include reports for the National Academy of Engineering 1971 72 include reports for the Institute
