Discovering Real Business Requirements for Software Project Success Robin F. Goldsmith, 2004 While a number of books on the market deal with software requirements this is the first resource to offer you a methodology for discovering and testing the real business requirements that software products must meet in order to provide value The book provides you with practical techniques that help prevent the main causes of requirements creep which in turn enhances software development success and satisfaction among the organizations that apply these approaches Complementing discovery methods you also learn more than 21 ways to test business requirements from the perspectives of assessing suitability of form identifying overlooked requirements and evaluating substance and content The powerful techniques and methods presented are applied to a real business case from a company recognized for world class excellence You are introduced to the innovative Problem Pyramid™ technique which helps you more reliably identify the real problem and requirements content From an examination of key methods for gathering and understanding information about requirements to seven guidelines for documenting and communicating requirements while avoiding analysis paralysis this book is a comprehensive single source for uncovering the real business requirements for your software development projects **Cars & Parts** ,1993

Keynote Presentations ,1999 **Asphalt Nation** Jane Holtz Kay, 2012-06-20 Asphalt Nation is a major work of urban studies that examines how the automobile has ravaged America's cities and landscape and how we can fight back The automobile was once seen as a boon to American life eradicating the pollution caused by horses and granting citizens new levels of personal freedom and mobility But it was not long before the servant became the master public spaces were designed to accommodate the automobile at the expense of the pedestrian mass transportation was neglected and the poor unable to afford cars saw their access to jobs and amenities worsen Now even drivers themselves suffer as cars choke the highways and pollution and congestion have replaced the fresh air of the open road Today our world revolves around the car as a nation we spend eight billion hours a year stuck in traffic In Asphalt Nation Jane Holtz Kay effectively calls for a revolution to reverse our automobile dependency Citing successful efforts in places from Portland Maine to Portland Oregon Kay shows us that radical change is not impossible by any means She demonstrates that there are economic political architectural and personal solutions that can steer us out of the mess Asphalt Nation is essential reading for everyone interested in the history of our relationship with the car and in the prospect of returning to a world of human mobility
