Toxic Amelia Fiske, Jonas Fischer, 2024-03-26 Over the past decade people have learned about oil contamination in the Ecuadorian Amazon through toxic tours in which a guide brings participants students lawyers environmental activists journalists and foreign tourists to visit contaminated sites These toxic tours combine personal experience and local knowledge to convince visitors of the immediacy of environmental issues Drawing on extensive research and fieldwork Toxic takes the reader on a visual toxic tour through the Amazon Following the story of three fictional participants this graphic novel paints a visceral picture of the waste pits gas flares and precarious lives of people in this region The book challenges the reader to consider what it means to live in a place and historical moment where victims of industrial toxicants are continually required to prove that harm has occurred Toxic is a vivid reflection on the role of pollutants in our everyday lives ultimately asking readers to reflect on how we are each implicated in the production consumption and exposure of pollution both in the Amazon and at home *Life without Lead* Daniel Renfrew, 2018-09-04 Life without Lead examines the social political and environmental dimensions of a devastating lead poisoning epidemic Drawing from a political ecology of health perspective the book situates the Uruguayan lead contamination crisis in relation to neoliberal reform globalization and the resurgence of the political Left in Latin America The author traces the rise of an environmental social justice movement and

Reckoning with Harm Amelia M. Fiske, 2023-10-17 An ethnography of the Ecuadorian Amazon that demonstrates the need for a relational place based contingent understanding of harm and toxicity Reckoning with Harm is a striking ethnographic analysis of the harm resulting from oil extraction Covering fifty years of settler colonization and industrial transformation of the Ecuadorian Amazon Amelia Fiske interrogates the relations of harm She moves between forest courtrooms and oily waste pits farms and toxic tours to explore both the ways in which harm from oil is entangled with daily life and the tensions surrounding efforts to verify and redress it in practice Attempts to address harm from the oil industry in Ecuador have been consistently confounded by narrow technocratic understandings of evidence toxicity and responsibility Building on collaborators work to contest state and oil company insistence that harm is controlled and principally chemical in nature Fiske shows that it is necessary to refigure harm as relational in order to reckon with unremediated contamination of the past while pushing for broad forms of accountability in the present She theorizes that harm is both a relationship and an animating feature of relationships in this place a contingent understanding that is needed to contemplate what comes next when living in a toxic world
