**Plug-in Vehicles, Plugged in Policy?** Great Britain: Parliament: House of Commons: Transport Committee,2012-09-20 Consumer demand for plug in vehicles remains very low and the Government grant to encourage demand may not be proving effective The Government must do more to show that its plug in vehicle strategy is a good use of public money Carbon emissions from transport must be reduced if the UK is to meet its climate change targets but public money must be targeted on effective policies So far Department for Transport expenditure on plug in cars some 11 million has benefited just a handful of motorists There is a risk that the Government is basically subsidising second cars for affluent households It is also unclear whether the provision of public charging infrastructure encourages demand for plug in cars Indeed the Government does not even have a register of all the chargepoints installed at public expense Ukraine Investment and Business Guide Volume 1
