 for a second course in basic statistics for undergraduates or first year graduate students introduces linear regression models
 and describes other linear models including Poisson regression logistic regression proportional hazards regression and
 nonparametric regression Numerous examples drawn from the news and current events with an emphasis on health issues
 illustrate these concepts Assuming only a pre calculus background the author keeps equations to a minimum and
 demonstrates all computations using SAS Most of the programs and output are displayed in a self contained way with an
 emphasis on the interpretation of the output in terms of how it relates to the motivating example Plenty of exercises conclude
 every chapter All of the datasets and SAS programs are available from the book s website along with other ancillary material
