charge by the sun and wind into a form that we can use This book uses simple classical physics mechanics thermodynamics and electromagnetism to quantitatively review sources of energy and how we use them It addresses key questions such as Can renewables such as solar and wind take over from fossil fuels How much will their use reduce CO2 emissions To see what is important numbers are used to estimate how big or small things are but the maths is kept at the level of simple algebra and trigonometry The aim is to give an overview of the big picture to only worry about what really makes a difference There s also growing concern that CO2 emissions from burning fossil fuels will change climate irreversibly in harmful ways
