*Studying Programming* Sally Fincher, 2006-02-13 We ve written this book to support students in studying programming It is not a text to teach any particular programming language but to be used alongside such a book or in conjunction with a taught course In *Studying Programming* we concentrate on what other books consider too obvious or too basic We explain the ideas that others assume you know we describe the things that can make learning to program a

frustrating experience if you don't know them. We stay with you through the process from starting with your very first blank screen to working on complex problems within a team. Studying Programming has been written by 9 members of the Computing Education Research Group at the University of Kent. All of us are practicing computing academics who also have a research interest in CS education. So we have a strong classroom background teaching students on a daily basis and a strong research background knowing what has been investigated and written on with regard to students' knowledge conception and difficulties in introductory programming.
