University Of Limpopo Application Forms 2015 Guide:

Research Methods for Educational Leadership and Management Musundire, Austin, 2025-05-13 Various research methods including action case study and experimental research can be tailored for educational leadership and management. Different research designs, data collection techniques and data analysis methods have differing strengths, weaknesses and challenges. As a result, it is crucial to develop the skills and confidence needed to conduct high quality research. Developing a deeper understanding of how to conduct rigorous research may consequently foster more effective and innovative research leading to improved educational policies, practices and outcomes. *Research Methods for Educational Leadership and Management* illustrates how these methods can be effectively applied to address issues in educational leadership and management. It promotes best practices in educational research by highlighting ethical considerations, addressing common challenges and providing strategies for overcoming these obstacles. Covering topics such as equity, employment practices, high performance culture and professional competencies, this book is an excellent resource for educational leaders, school managers, school administrators, policymakers, researchers, professionals, scholars, academicians and more. [The Urban Ecologies of Divided Cities](#) Amira Osman, John Nagle, Sabyasachi Tripathi, 2023-06-12 The book discusses how division affects the fabric of cities and people's sense of identity and agency and are reflected in physical features, architecture and urban planning. The question of divided cities represents a complex and multistranded urban ecology at once both social and spatial; it cannot be limited to a single science or discipline such as social or spatial fields. This suggests integrated and cross disciplinary understandings as well as integrated or parallel approaches and solutions. Urban ecologies of division manifest in multiple forms. One of their most palpable expressions is conflict with parallels around the world and often with correlations in the spatial fabric. Violence in such contexts is often a surface expression of deeper socio economic or ideological differences. Whether as a result of intervention by authority or by dissent between groups, a divided city inevitably becomes a place of conflict in various forms and intensity, eroding the joy of living and sense of collective belonging to the detriment of all. In effect, it erodes the collective advantage of being part of a more unified society. A city exists in collections of social structures which mutually form a society. A divided city implies divided social structures and in consequence a divided society. The papers compiled in this book present many case studies of divided cities, discussing the different causes of divisions and their effects on societies. Some of the causes can be linked to conflicts, wars, colonialism or legislative political systems. In response to the serious challenges resulting from these divisions, the book aims to provide opportunities for new approaches and possibilities for new interventions and solutions, making it significant to urban planners, architects and policymakers.
