Meteorological Disasters in Medieval Britain (AD 1000–1500) Peter J. Brown,2023-08-21 When high magnitude meteorological hazards impact vulnerable human populations disasters are the inevitable consequence Through archaeological and historical evidence this book investigates how these sudden and unpredictable events affected British medieval populations AD 1000 1500 Medieval society understood disasters in a practical sense and took steps to minimise risk by constructing flood defences and reinforcing structures damaged by storms At the same time natural hazards were widely interpreted through a framework of religious and superstitious beliefs and a wide variety of measures were followed to secure protection against the dangers of the natural world Disasters therefore were interpreted through a duality of understanding in which their occurrence could be the result of spiritual or superstitious triggers but practical solutions were a key component in mitigating their tangible impacts In evaluating this duality this book focuses on specific case studies and considers both their diverse historical contexts as well as their consequences for society against the backdrop of significant

Tapete, 2018-04-27 This book is a printed edition of the Special Issue Remote Sensing and Geosciences for Archaeology that was published in Geosciences *Revolution, Counterrevolution and Assassination After World War II* Robert C. Cottrell, 2024-12-05 In response to the upheavals engendered by World War II revolutions broke out or loomed throughout the world Nationalist aspirations proved global in nature ironically empowered by the Cold War In Asia the Middle East Latin America and Africa revolutions and counterrevolutions proliferated and similar disruptions threatened to unfold in Europe and North America Social upheavals began to occur in Vietnam Mandatory Palestine China Algeria Ghana and Cuba Conservative and reactionary forces frequently pushed back quashing hopeful developments like the Guatemalan Spring the Hungarian Revolution and the Prague Spring while also readily resorting to the murder of leading progressive figures from Gandhi to Navalny The second volume of this detailed history explores the rippling effects of World War II across the globe including countries experiencing colonial or neocolonial relationships This book examines the interplay between modern revolutionary movements and campaigns seeking to prevent such movements or to reestablish a history and time that never really existed It also traces the deadly resort to politically motivated killings which cut short the lives of so many distinguished sometimes beloved figures whose loss is still felt decades later Media Practices and Changing African

Socialities Jo Helle-Valle, Ardis Storm-Mathisen, 2020-03-01 Deriving from innovative new work by six researchers this book questions what the new media's role is in contemporary Africa The chapters are diverse covering different areas of sociality in different countries but they unite in their methodological and analytical foundation The focus is on media related practices which require engagement with different perspectives and concerns while situating these in a wider analytical context The contributions to this collection provide fresh ethnographic descriptions of how new media practices can affect socialities in significant but unpredictable ways *Archaeological 3D GIS* Nicolò Dell'Unto, Giacomo Landeschi, 2022-02-06

Archaeological 3D GIS provides archaeologists with a guide to explore and understand the unprecedented opportunities for collecting visualising and analysing archaeological datasets in three dimensions With platforms allowing archaeologists to link query and analyse in a virtual georeferenced space information collected by different specialists the book highlights how it is possible to re think aspects of theory and practice which relate to GIS It explores which questions can be addressed in

such a new environment and how they are going to impact the way we interpret the past By using material from several international case studies such as Pompeii and as well as prehistoric and protohistoric sites in Southern Scandinavia this book discusses the use of the third dimension in support of archaeological practice This book will be essential for researchers and scholars who focus on archaeology and spatial analysis and is designed and structured to serve as a textbook for GIS and digital archaeology courses The Open Access version of this book available at www.taylorfrancis.com has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license

Perspectives on Public Policy in Societal-Environmental Crises Adam Izdebski, John Haldon, Piotr Filipkowski, 2022-07-14 This is an open access book Histories we tell never emerge in a vacuum and history as an academic discipline that studies the past is highly sensitive to the concerns of the present and the heated debates that can divide entire societies But does the study of the past also have something to teach us about the future Can history help us in coping with the planetary crisis we are now facing By analyzing historical societies as complex adaptive systems we contribute to contemporary thinking about societal environmental interactions in policy and planning and consider how environmental and climatic changes whether sudden high impact events or more subtle gradual changes impacted human responses in the past We ask how societal perceptions of such changes affect behavioral patterns and explanatory rationalities in premodernity and whether a better historical understanding of these relationships can inform our response to contemporary problems of similar nature and magnitude such as adapting to climate change
