Prayer is a major topic within Christian theology The biblical text has various references to various recorded and reported prayers In fact references to prayer are found within the rich diversity of the various books corpora and genres of Scripture As can be expected much has been written about prayer in the biblical text However a comprehensive Biblical Theology dealing with the concept of prayer in Scripture has not been published before and this book intends to fill this gap assuming that such an approach can provide a valuable contribution to the theological discourse on prayer and related concepts This book aims to investigate prayer and its related elements including worship praise thanksgiving adoration petition intercession lament and confession in the Old Testament on a book by book or corpus by corpus basis The investigation follows a Biblical Theological approach reading the Old Testament on a book by book basis in its final form to uncover the Old Testament's overarching theology of prayer understanding the parts in relation to the whole By doing this the discrete nuances of the prayers of the different Old Testament books and corpora can be uncovered letting the books and corpora speak for themselves In addition the advantage of this approach is that it provides findings that can benefit the modern Christian community and contribute to the practice of Reformed theology in Africa This book is of significant value to scholars It will inspire scholars to think about prayer and use the Bible as the major prayer handbook in their spiritual lives

Reconceptualising education support services in South Africa Johnnie Hay, Macalane J. Malindi, Thabo Makhalemele, 2022-02-10 Inclusive education has been phased into South Africa since 2001 but relies heavily upon adequate support services to support learners and teachers experiencing barriers to learning and development This book focuses on the different levels of support provided in South African education from School based Support Teams to District based Support Teams through to special and full service schools and how these could be reconceptualised to provide improved support to learners and teachers Current research indicates that inclusive education is being implemented in varied and fragmented forms across the country and the point of departure of this work is that education support services need to be improved and reconceptualised to ensure better support for inclusive education *Christian ethics and political economy* Morten Bøsterud, Jan C.M. Venter, 2020-12-31 The value free and relativistic human and scientific discourses have led to an era of ideology From fascism at the dawn of the century through liberalism and the associated phenomenon of unfettered statism to the current disillusionment of postmodernism and relativism with endeavours towards new mercantilism All have maintained poverty inequality and created scepticism amongst both lay persons and academics Above all else a renewed yearning for moral and ethical direction in political and economic conduct has been created This book provides a Christian ethical reflection on political economic conduct in South Africa as an alternative to current modernistic ideas This book aims to produce new Christian ethical insight into the value of new liberal perspectives on the enhancement of the South African political economy New Christian ethical insight will be gained through new perspectives on the South African political economy **Becoming a teacher** Josef de Beer, 2020-12-31 This book disseminates original research on learning in and from practice in pre service teacher education Authors such as Lederman and Lederman describe the student teaching practicum or work integrated learning WIL which is an essential component of pre service teacher education as the elephant in the room These authors note that the capstone experience in any teacher education programme is the student teaching

practicum after all this is where the rubber hits the road. However, many teacher educators will agree that this WIL component is sometimes very insufficient in assisting the student teacher to develop their own footing and voice as a teacher. This is the gap that this research book addresses. Most of the chapters in the book report empirical data, with the exception of two chapters that can be categorized as systematic reviews. WIL is addressed from various angles in the chapters. Chapter 6 focuses on research related to what makes Finnish teacher education so effective, and in Chapter 4, researchers of the University of Johannesburg disseminate their findings on establishing a teaching school based on Finnish insights in Johannesburg. Chapter 3 highlights the challenges faced in open and distance learning teacher education contexts. Several of the chapters disseminate research findings on alternative interventions to classic WIL, namely where safe spaces or laboratories are created for student teachers to learn and grow professionally. These could either be simulations such as software programmes and avatars in the intervention described in Chapter 2, student excursions as the findings in chapters 5, 7, and 10 portray, or alternative approaches to WIL, e.g. Chapters 11 and 12. The book is devoted to scholarship in the field of pre-service teacher education. The target audience is scholars working in the fields of pre-service teacher education, work integrated learning, and self-directed learning. The book makes a unique contribution in terms of firstly its extensive use of Cultural Historical Activity Theory as a research lens, and secondly in drawing on various theoretical frameworks. Both quantitative and qualitative research informed the findings of the book.

Self-Directed Learning in the era of the COVID-19 pandemic Josef de Beer, Neal Petersen, Elsa Mentz, Robert J. Balfour, 2023-03-01. The book is devoted to scholarship in the field of pre-service teacher education with a specific focus on research into the enhancement of self-directed learning and contributes to the discourse on creating a disposition towards self-directed learning during the social and academic integration of first-year students within higher education institutions. Two chapters also deal with research on the development of self-directed learning and nuanced understandings of the chosen professions of Law and Health Sciences students. The target audience is scholars working in the fields of teacher education, self-directed learning, engaging pedagogies, problem-based learning, cooperative learning, and gamification. Whereas social constructivist learning theory served as an overarching theoretical framework for the virtual excursions, the various chapters in the book also draw on other secondary theories such as self-determination theory, social interdependence theory, gender theory, and the with fitness model of Kounin (1970).

Problem-based learning and pedagogies of play Marietjie Havenga, Jako Olivier, Byron J. Bunt, 2023-08-22. Malindi, Johnnie Hay, Thabo Makhalemele, 2024-02-23 The COVID 19 pandemic and the restrictions that came with it led to unprecedented disruptions in learner development and put them at risk of poor developmental outcomes It is thus important that the extent of the disruption on their development and the support needs of learners be investigated Researching the impact of the disruption should focus on holistic development In this book the authors use multiple research approaches and methods of gathering data in their respective fields to examine the impact of the disruption and determine the support needs of learners Data gathered through the different methods are processed and findings are presented The findings have implications for both practice and future research in the fields of inclusive education learner support educational psychology movement education Life Orientation and curriculum development **International Handbook of Learning, Teaching and Leading in Faith-Based Schools** Judith D.
