**An Evaluation of the First and Second Phases of Cost Sharing in Higher Education in Tanzania** I. M. Omari,2002

Corrupted Jonathan D Jansen,2023-02-01 In South African higher

education the images of dysfunction are everywhere Student protests Violence Police presence Rubber or real bullets Class disruptions Burning tyres Damaged buildings Injury and sometimes death Reports of wholesale corruption Year after year often in the same set of universities the problem of routine instability seems insoluble The financial academic and reputational costs of ongoing dysfunction are high especially for those universities caught up in the never ending struggle to overcome apartheid legacies Any number of explanations have been ventured including a lack of resources shortage of capacity rural location corrupt officials and endemic conflict Corrupted takes a deeper look at dysfunction in an attempt to unravel the root causes in a sample of South African universities At the heart of the problem lies the vexed issue of resources or more pertinently the relationship between resources and power who gets what and why Whatever else it aspires to be commonly a place of teaching learning research and public duty a university in an impoverished community is also a rich concentration of resources around which corrupt staff students and those outside of campus all vie for access Taking a political economic approach Jonathan Jansen describes the daily struggle for institutional resources and offers accessible sensible insights He argues that the problem won't be solved through investments in capacity building alone because the combination of institutional capacity and institutional integrity contributes to serial instability in universities Rather durable solutions would include the depoliticisation of university councils and appointments of academics with integrity and capacity to manage and lead these fragile institutions This groundbreaking and long overdue study will offer a promising way forward for universities to better serve their communities and the country more broadly *National Youth Development Agency Annual Report South Africa. National Youth Development Agency, 2016* *No Last Place to Rest Dineo Skosana, 2025-02-01* This book examines the impact of coal mining on the lives of former labour tenant and rural communities in post apartheid South Africa No Last Place to Rest Coal Mining and Dispossession in South Africa is an exploration of the ongoing struggles faced by families in the Mpumalanga and KwaZulu Natal provinces of South Africa whose lives have been upended by the relentless expansion of coal mining operations These regions burdened with the task of fulfilling the nation's energy needs and boosting the country's economy witness daily the harsh realities of dispossession that extend far beyond the mere loss of property Dineo Skosana presents a compelling argument that dispossession remains a present day reality and crisis contradicting the notion that it is merely a relic of the past in the post apartheid landscape It challenges the narrow perspective that equates land loss in material and economic terms only Skosana considers the impact of grave relocations a common occurrence in these mining dominated locales and the profound spiritual anguish and dehumanisation communities endure as their lands are excavated In African societies connections to the land extend beyond the material land has a sacred and ancestral value Grave relocations disrupt this connection families have with their ancestors In dispossessing not only the living but also the dead from their lands the author argues that the act wounds the collective soul of a people eroding their cultural heritage and collective identity and belonging This book offers a rich ethnographic account of the experiences

struggles and resistance of the affected communities as well as a critical analysis of the legal and policy frameworks that enable their exploitation In relation to the land question in South Africa No Last Place to Rest presents deep insights for communities activists and government sectors acting in support of social justice and redress Critical Social Work Studies in South Africa Annaline Keet,Nevashnee Perumal,Veonna Goliath,2022-11-18 Critical Social Work Studies in South Africa Prospects and Challenges is a convergence of 18 critical Black African minds from various South African universities who challenge the hegemonic status quo in society In this collection of conceptual and empirical papers each author tells a compelling story with common themes that are firmly rooted in advancing decolonial knowledge This book covers pertinent issues in social work practice and education ranging from rethinking parenting roles utopian notions of family mediation practice in relation to unmarried fathers to race and landlessness The book contains practical suggestions in respect of decolonising the self as well as social work curricula in higher education In addition Critical Social Work Studies in South Africa Prospects and Challenges delves into trusting relationships as cornerstones to effective supervision centring African spirituality in social work economic emancipation of Black women cultural trauma as well as drug abuse prevention Based on the range of themes this book would benefit social work practitioners students academics social activists and anyone who is curious to understand how decoloniality may be operationalised in social work **Addressing South Africa's Moral Crisis** Nico Vorster,2025-08-22 This book attempts to understand and address the psycho social dynamics behind South Africa s moral crisis It describes South Africa as afflicted by state capture violence corruption and the looting of state infrastructure thirty years after the establishment of democracy It then provides a holistic social diagnosis of this problem that integrates the findings of different disciplines into an overall picture of the forces at work in South Africa s collective moral decline Ultimately this book engages with the deeper psycho social phenomena behind South Africa s moral decline arguing that the diagnostic question of why this moral decline has taken place must be answered before turning to the normative question of what ought to happen in this situation Accordingly this book explores themes regarding the innate moral capacities of the human person the effects of need pressures and systemic pressures on ethical decision making and the phenomena of distorted motivational drives and distorted behavioral responses It shows how the framing of virtue centered moral identities might act as buffers against moral disengagement strategies and assist in promoting pro social behavior It then specifies the macro social changes required to create such an ethical social climate The book is of interest to social scientists ethicists behavioral scientists educators theologians and moral philosophers In the end this case study of South Africa shows us more broadly how maintaining public morality and social cohesion is a challenge that most modern societies face *The Rise of the Radical Right in the Global South* Rosana Pinheiro-Machado,Tatiana Vargas-Maia,2023-05-31 The Rise of the Radical Right in the Global South is the first academic study adopting an interdisciplinary and international perspective to offer a comprehensive and groundbreaking framework for understanding the emergence and consolidation of different radical right

movements in Global South countries in the twenty first century From deforestation and the anti vaccine movement in Bolsonaro s Brazil to the massacre of religious minorities in Modi s India the rise of the radical right in the Global South is in the news every day Not long ago some of these countries were globally celebrated as emerging economies that consolidated vibrant democracies Nonetheless they never overcame structural problems including economic inequality social violence cultural conservatism and political authoritarianism Featuring case studies from Brazil India the Philippines and South Africa and more generally from Africa and Latin America this book analyses future scenarios and current alternatives to this political movement to the radical right It proposes a shift of focus in examining such a trend adopting a view from the Global South conventional theoretical tools developed around the experience in Global North countries are not enough The authors show that the radical right in the Global South should be analysed through specific lenses considering national historical patterns of political and economic development and instability They also warn that researching these countries may differ from contexts where democratic institutions are more reliable This does not mean abandoning a transnational understanding of the radical right rather it calls for the opposite the chapters examine how the radical right is invented adapted modified and resisted in specific regions of the globe This volume will be of interest to all those researching the radical right and the politics of development and the Global South
