Up Board Allahabad 2014:

In Deep Water Michael Brennan, 2019-09-13 Irish Water was set up in 2013 to introduce the most ambitious water metering programme in the world. The plan was to get Irish people to finally pay to upgrade a nineteenth century water system. The water metering programme began in August 2013 and was carried out at breakneck speed. However, it did not go to plan and the issue of water charges divided Ireland. There were nationwide demonstrations and confrontations in housing estates involving water meter contractors, garda and water charge protesters. The programme ended in political disaster with a humiliated government having to send out one million refunds. With access to unpublished documents and interviews with the key personalities on both sides, *In Deep Water* provides a blow by blow account of how it all went wrong. The rows at cabinet. The warnings that went unheeded. The water women. The smartphone wielding protesters. And the minister who threatened to reduce people's water to a trickle. Compulsively readable and fast paced, *In Deep Water* gives an inside view of the controversy that divided Ireland.

Austerity and Recovery in Ireland William K. Roche, Philip J. O'Connell, Andrea Prothero, 2016-12-06 In international commentary and debate on the effects of the Great Recession and austerity, Ireland has been hailed as the poster child for economic recovery and regeneration out of deep economic and fiscal contraction. While the genesis of Ireland's financial, economic and fiscal crisis has been covered in the literature, no systematic analysis has yet been devoted to the period of austerity, to the impact of austerity on institutions and people, or to the roots of economic recovery. In this book, a group of Ireland's leading social scientists present a multidisciplinary analysis of recession and austerity and their effects on economic, business, political and social life. Individual chapters discuss the fiscal and economic policies implemented, the role of international and in particular of EU institutions, and the effects on businesses, consumption, work, the labour market, migration, political and financial institutions, social inequality and cohesion, housing and cultural expression. The book shows that Ireland cannot be viewed uncritically as a poster child for austerity. While fiscal contraction provided a basis for stabilizing the perilous finances of the state, economic recovery was due in the main to the long established structure of Irish economic and business activity, to the importance of foreign direct investment and the dynamic export sector, and to recovery in the international economy. The restructuring and recovery of the financial system was aided by favourable international developments, including historically low interest rates and quantitative easing. Migration flows, nominal wage stability, the protection of social transfer payments, and the involvement of trade unions in severe public sector retrenchment, long established features of Irish political economy, were of critical importance in the maintenance of social cohesion.

Vivre Ici Alison J. Murray Levine, 2018-03-19 *Vivre Ici* analyzes a diverse selection of contemporary French documentaries about spaces and places in France. Integrating film theory, eco-criticism and cultural history, Levine investigates documentary cinema as experience. The book reveals a collage-like, fragmented vision of France as seen through documentary cameras and explores the social and political consequences of these films that matter.
