David Andrew Turner, 2012-01-01 The quality of higher education is a hot topic especially as students around the world are asked to pay more towards their own education and expect to get what they pay for In addition league tables both national and international have come to dominate discussion with several governments and many institutions setting themselves the goal of improving their ratings In this volume Professor Turner examines the assumptions that are being made about what counts as quality and what the traditional purposes of universities are But with the growth of mass higher education and the rise of student centred approaches to learning and teaching it has become increasingly clear that high quality education is education that meets the needs of the student at that particular moment and promotes their future development After examining a range of different approaches to the quality of higher education and its measurement Professor Turner develops an approach to benchmarking and quality enhancement that is better suited to the ethos of individualised learning and uses it to critique the philosophies that have dominated debates about quality to date This book will be of interest to scholars of higher education but also has something important to add to debates that engage policy makers in higher education It provides a background to the historical development of universities which might help postgraduate students and new members of faculty understand the process in which they are engaged *Internationalisation of African Higher Education*

Chika Sehoole, Jane Knight, 2013-10-30 The role of higher education especially the international dimension is given little importance in the discourse on achieving the Millennium Development Goals MDGs in Africa This book aims to change that The potential of higher education's contribution to Africa's development remains unrealized and often misunderstood In today's globalised world which prioritises economic growth through liberalised trade and competitive market strategies much emphasis has been placed on higher education's ability to produce graduates to serve the labour market and produce new knowledge for the knowledge economy While these are important contributions the book argues that international higher education and new knowledge must go beyond economic purposes and serve the human and social development needs of the continent It is against this background that the African Network for the Internationalisation of Education ANIE undertook research on the international dimension of higher education in Africa and its role in the achievement of the MDGs Through empirical research seven case studies address how international and regional higher education programmes and policies in African universities can address MDG priorities of promoting gender equality and women's empowerment combating HIV AIDS and establishing global partnerships for development through academic mobility joint research initiatives curriculum innovation and policy development **Creating the Ethical Academy** Tricia Bertram

Gallant,2011-09-22 In this edited volume higher education experts and scholars tackle the challenge of understanding why ethical misconduct occurs in the academy and how we can address it *Universities in Change* Andreas Altmann,Bernd Ebersberger,2012-09-13 Universities find themselves in dynamic change They are confronted with growing expectations from their stakeholders increasing international competition and new technological challenges Featuring insights and in depth case studies from leading researchers and university decision makers from around the world this book argues that institutions of higher education in order to be successful have to actively reflect on circumstances visions and strategies to master the future Drawing from their experiences across a diverse array of institutions in Europe Asia and the Americas the authors explore the pressures on today s universities and the opportunities for excelling in the contest for resources They discuss operational issues such as strategic management IT governance leadership development and entrepreneurial culture and broader concerns such as the roles and responsibilities of universities in promoting technology transfer and economic and social development The result is a resource that not only reveals and analyzes universities from an organizational perspective but presents best practice models and concrete inspiration for management and policymaking Digital Information Hazel M.
