Mapungubwe Reconsidered MISTRA MISTRA, 2015-06-03 The Mapungubwe Cultural Landscape is one of the profound treasures of southern Africa's social and archaeological history appropriately declared a World Heritage Unesco in 2003. Contained within this landscape is indispensable information on precolonial state formation, social hierarchies, architecture of stone-walled towns, mineral processing and intercontinental trade. And yet the Mapungubwe state rose, towered over its environs and then declined long before European colonial incursions. What exactly were the social dynamics in this polity? What technologies did it utilise? How did it relate to neighbouring polities? In this combined edition of two MISTRA publications now jointly titled *Mapungubwe Reconsidered: A Living Legacy*, MISTRA seeks to contribute to the body of knowledge about Mapungubwe straddling such issues as the relationships between humans and the environment, management of mineral endowments and the form and impact of southern Africa's global intercourse in this historical period.

Research Anthology on Collaboration, Digital Services, and Resource Management for the Sustainability of Libraries Management Association, Information Resources, 2021-01-15 Faced with increased budget cuts, libraries must continue to advance their services through new technologies and practices in order to keep pace with the rapid changes society is currently facing. The once traditional in-person services offered can no longer be the only option, and to keep themselves afloat, libraries must offer more in terms of digital services. The convenience of offering mobile and digital services brings a new wave of accessibility to libraries and a new question on just how much libraries will need to change to meet the newfound needs of its patrons. Beyond offering these digital services, libraries are incorporating other types of technology in multifaceted ways such as utilizing artificial intelligence, practices, social media and big data management. Moreover, libraries are increasingly looking for ways to partner and collaborate with the community, faculty, students and other libraries in order to keep abreast of the best practices and needs of their users. The *Research Anthology on Collaboration, Digital Services, and Resource Management for the Sustainability of Libraries* explores emerging strategies and technologies that are redefining the role of the library within communities and academia. This reference book covers extensive ground on all the ways libraries have shifted to manage their resources, digitalize their services and market themselves within the new technological revolution. These continued shifts for libraries come with benefits, challenges and future projections that are critical for discussion as libraries continue to strive to remain updated and relevant in times of change. This book is ideal for librarians, archivists, collection managers, IT specialists, electronic resource librarians, practitioners, stakeholders, researchers, academicians and students who are interested in the current state of libraries and how they are transforming to fit modern needs.

Decolonising Digital Media and Indigenisation of Participatory Epistemologies Fulufhelo Oscar Makananise, Shumani Eric Madima, 2024-08-13 The book provides valuable insights on decolonising the digital media landscape and the indigenisation of participatory epistemologies to continue the legacies of indigenous languages in the

global South It is one of its kind as it climaxes that the construction phase of self determining and redefining among the global South societies is an essential step towards decolonising the digital landscape and ensuring that indigenous voices and worldviews are equally infused represented and privileged in the process of higher level communication exchanging epistemic philosophies and knowledge expressions The book employs an interdisciplinary approach to engage in the use of digital media as a sphere for resistance and knowledge transformation against the persistent colonialism of power through dominant non indigenous languages and scientific epistemic systems It further advocates that decolonising digital media spaces through appreciating participatory epistemologies and their languages can help promote the inclusion and empowerment of indigenous communities It indicates that the decolonial process can also help to redress the historical and ongoing injustices that have disadvantaged many indigenous communities in the global South and contributed to their marginalisation This book will appeal to undergraduate and graduate students scholars and academics in communication media studies languages linguistics cultural studies and indigenous knowledge systems in higher education institutions It will be a valuable resource for those interested in epistemologies of the South decoloniality postcoloniality indigenisation participatory knowledge indigenous language legacies indigenous artificial intelligence and digital media in the Fourth Industrial Revolution
