Shah, A.B. Pandit, V.S. Moholkar, 2012-12-06 The literature on cavitation chemistry is ripe with conjectures possibilities heuristic arguments and intelligent guesses The chemical effects of cavitation have been explained by means of many theories consisting of empirical constants adjustable parameters and the like The chemists working with cavitation chemistry agree

that the phenomenon is very complex and system specific. Mathematicians and physicists have offered partial solutions to the observed phenomena on the basis of cavitation parameters whereas chemists have attempted explanations based on the modes of reaction and the detection of intermediate chemical species. Nevertheless, no one has been able to formulate a unified theme, however crude, for its effects on the basis of the known parameters such as cavitation and transient chemistry involving extremely high temperatures of nanosecond durations. When one surveys the literature on cavitation assisted reactions, it is clear that the approach so far has been Edisonian in nature. While a large number of reactions have showed either enhanced yields or reduced reaction times, many reactions have remained unaffected in the presence of cavitation. The success or failure of cavitation reactions ultimately depends on the collapse of the cavity. Cavitation chemistry is based on the principles of the formation of small transient cavities, their growth and implosion, which produce chemical reactions caused by the generation of extreme pressures and temperatures and a high degree of micro turbulence.

The papers are organized in the following topical sections: Application of Artificial Intelligence and Machine Learning in Healthcare; Using Natural Language Processing for Solving Text and Language related Applications; Using Different Neural Network Architectures for Interesting applications; Using AI for Plant and Animal related Applications; Applications of Blockchain and IoT; Use of Data Science for Building Intelligence Applications; Innovations in Advanced Network Systems; Advanced Algorithms for Miscellaneous Domains; New Approaches in Software Engineering.

### **Intelligent Solutions for Smart Grids and Smart Cities**

Pierluigi Siano, Sheldon Williamson, Sabeena Beevi, 2023-05-24. This book comprises the select proceedings of the International Conference in Power Energy Control Signals and Systems IPECS 2022. The book focuses on intelligent solutions for smart grids and smart cities. The content of this book is designed to develop many innovative ideas for an energy efficient and sustainable future. It focuses on recent technological advances and challenges in the field of grid integration of renewable energy resources, AI/ML in power and energy systems, security enhancement of power systems, electronics using advanced ML techniques for integration of renewable energies, electric vehicle energy storage and battery charging technologies, etc. The book also covers the latest advances especially in instrumentation and control in smart grid applications, Internet of Things and cyber physical systems, power semiconductor device technology leading to improvements in power losses for power electronic systems, economic and sustainable design of smart cities, security and data privacy in smart cities, lighting and illumination. This book proves to be a valuable resource for those in academia and industry.
