The Diversity Bargain Natasha K. Warikoo, 2016-11-15 We've heard plenty from politicians and experts on affirmative action and higher education about how universities should intervene if at all to ensure a diverse but deserving student population But what about those for whom these issues matter the most In this book Natasha K Warikoo deeply explores how students themselves think about merit and race at a uniquely pivotal moment after they have just won the most competitive game of their lives and gained admittance to one of the world's top universities What Warikoo uncovers talking with both white students and students of color at Harvard Brown and Oxford is absolutely illuminating and some of it is positively shocking As she shows many elite white students understand the value of diversity abstractly but they ignore the real problems that racial inequality causes

and that diversity programs are meant to solve They stand in fear of being labeled a racist but they are quick to call foul should a diversity program appear at all to hamper their own chances for advancement The most troubling result of this ambivalence is what she calls the diversity bargain in which white students reluctantly agree with affirmative action as long as it benefits them by providing a diverse learning environment racial diversity in this way is a commodity a selling point on a brochure And as Warikoo shows universities play a big part in creating these situations The way they talk about race on campus and the kinds of diversity programs they offer have a huge impact on student attitudes shaping them either toward ambivalence or in better cases toward more productive and considerate understandings of racial difference Ultimately this book demonstrates just how slippery the notions of race merit and privilege can be In doing so it asks important questions not just about college admissions but what the elite students who have succeeded at it who will be the world s future leaders will do with the social inequalities of the wider world

Access to Higher Education Anna Mountford-Zimdars, Neil Harrison, 2016-11-18 How do we understand and explain who has access to higher education How do we make sense of persisting and new forms of inequality How can global national and institutional policymakers and practitioners make higher education more inclusive **Access to Higher Education Theoretical perspectives and contemporary challenges** seeks to update thinking on these questions combining new voices and emerging perspectives with established writers in the field This pioneering text highlights the contribution of social theory to issues of access to education with chapters introducing and drawing on the works of key interdisciplinary thinkers including Pierre Bourdieu Margaret Archer Amartya Sen and Herbert Simon It then moves to examines how theoretical perspectives can be applied to the contemporary challenges of forging more equal access with examples drawn from a wide range of contexts including the UK the US Australia South Africa and Japan Global in scope this book documents the shared nature of the access challenge in a period when higher education is growing rapidly but inequalities continue to be stark It concludes by proposing a new direction for research and a reassertion of the role of the researcher as a social activist for disconnected and disadvantaged groups equipped with the thinking tools needed to move the agenda forward **Access to Higher Education** is a rigorous text for the global research community with relevance to policymakers practitioners and postgraduate students interested in social justice and social policy It provides those with an academic interest in access and a commitment to enhancing policy with theoretical and practical ideas for moving the access agenda forward in their institutional regional or national contexts Journal of Education Culture and Society 2015_2 , Nic nie wpisano

Mulinge, N. Arasa, 2017-05-05

This book examines the concept of the democratization of governance in universities in Kenya with particular emphasis on students involvement in governance processes and decision making Data were collected from members of the student community utilizing a structured self administered questionnaire and from purposively selected key informants and focus group discussants drawn from Kenyatta University representing the public sector and the United States International University representing the private sector The guiding argument for the study was that shared governance one of the principles of good governance is critical in enabling the universities to deliver their visions and the missions effectively The results revealed that while in principle Kenyan universities have embraced democratic governance in which all stakeholders including students have a role to play in practice they continue to violate the core principles of good governance particularly shared governance Specifically students who are major stakeholders in university education are largely excluded from significant structures of governance thereby limiting their influence and participation Although their representation is mainly

provided via student self governance organs unions associations and or councils their effectiveness is undermined considerably by the lack of trust and confidence of the student body and the unending manipulation by top university administrators and external political actors Student active involvement in decision making is mainly confined to lower levels such as the school faculty and departmental programme The authors call for a paradigm shift in the involvement of students in the governance of universities in ways that discourage the current culture of tokenism and political correctness that characterizes public and private universities in Kenya
