Ijeoma,Ogochukwu I. Nzewi,2018-12-31 The aim of this scholarly collected work is to contribute to the scientific discourse on public administration in a globalised environment The book reflects on governance challenges in South Africa and in Africa with its point of departure being the master narratives the so called grand debates such as New Public Management and specifically the role of technology It also reflects on the so called middle range discourses concerning organisational level issues in government e g leadership and work procedures and explores new solutions to old governance challenges like corruption and service delivery The uniqueness of this collected work lies in its ability to reflect on existing philosophies and practices in an innovative way Through its multidisciplinary lens the book opens up a new vision for the future of public administration in the South African context and on the African continent not neglecting the current local regional and global environment Until recently globalisation was considered an entrenched world order but international political events during the course of the past few years have resulted in one of the biggest challenges to its endurance in recent history This includes developments such as the successful referendum in Britain to exit the European Union highlighting the growth of a severe nationalist and protectionist agenda that may be a signal of the unravelling of the current globalism world order These developments inspire deeper interrogation of the challenges to effective public administration globally and the ripple effects in South Africa and Africa as a whole Pointedly it is evident that ensuring the voice of citizens in policy decision making remains a critical governance challenge On the policy front there are perennial challenges of land reform service delivery and poverty while on the governance front corruption has metastasised with a growing culture of impunity and lack of accountability in leadership In the midst of growing corruption and more than 20 years into democracy South Africa s income inequality remains one of the highest in the world This setting constitutes the context of the research outcome published in this scholarly work

 Corrigan, 2024-09-10 This book examines the nature of the 1994 political transition in South Africa and its impact on post
 apartheid South Africa Specifically it examines the failures of liberalism within the context of the transitional process that led
 to the institution if not the practice of a non racial state in 1994 The term liberal is an eclectic term defining a several of
 views political and economic We use the term here within context but essentially define it as a commitment to open views the
 willingness to consider change and to value basic human rights The nature of institutional change in South Africa as it moved
 towards a democratic state would influence whether South Africa would succeed as a newly industrializing pluralist
 democratic country or collapse into yet another African failed state As South Africa moves toward its fourth decade of
 majority rule the view towards the future is much less promising than it was in 1994 Higher Education Pathways Paul
 Ashwin, M. Case, 2018-12-13 In what ways does access to undergraduate education have a transformative impact on people

 to the public good including inclusive economic development These questions have particular resonance in the South African
 higher education context which is attempting to tackle the challenges of widening access and improving completion rates in
 in a system in which the segregations of the apartheid years are still apparent Higher education is recognised in core
 legislation as having a distinctive and crucial role in building post apartheid society Undergraduate education is seen as

Beyond Tenderpreneurship MISTRA MISTRA,2020-04-16 Black Economic Empowerment BEE policies have been a central pillar of attempts to overcome the economic legacy of apartheid Yet more than two decades into democracy economic exclusion in South Africa still largely reflects the fault lines of the apartheid era Current discourse often conflates BEE with the so called tenderpreneurship referred to in the title namely the reliance of some emergent black capitalists on state patronage Authors go beyond this notion to understand BEEs role from a unique perspective They trace the history of black entrepreneurship and how deliberate policies under colonialism and its apartheid variant sought to suppress this impulse In the context of modern South Africa authors interrogate the complex dynamics of class formation economic empowerment and redress against the backdrop of broader macroeconomic policies They examine questions relating to whether B BEE policies are informed by strategies to change the structure of the

economy These issues are explored against the backdrop of the experiences of other developing countries and their journeys of industrialisation The relevant black empowerment experiences of countries such as the United States are also discussed The authors identify policy and programmatic interventions to forge the non racial future that the constitution enjoins South Africans to build
