### **Teacher Development in Higher Education**

Eszter Simon, Gabriela Pleschová, 2012. Concerns about the quality of teaching and learning in higher education have given rise to teacher development programs and centers around the world. This book investigates the challenges and complexities of creating instructional development programs for present and future academics. Using case studies from a variety of countries including Estonia Singapore the United States and the United Kingdom it examines issues that are important for higher education researchers as well as for higher education managers. The book introduces different responses from around the world to the need to improve teaching in higher education demonstrates many different ways success may be understood and investigates what factors may influence the results of instructional development. Contributors use these factors as well as those found in the related literature to explain program success through theoretical frameworks. This book also provides input for higher education managers by pointing out how the local context and both institutional and national policy making may help or hinder the effective preparation of professors for their teaching responsibilities.

**Breaking Ranks** Colin Diver,2022-04-12 Some colleges will do anything to improve their national ranking That can be bad for their students and for higher education Since U S News World Report first published a college ranking in 1983 the rankings industry has become a self appointed judge declaring winners and losers among America s colleges and universities In this revealing account Colin Diver shows how popular rankings have induced college applicants to focus solely on pedigree and prestige while tempting educators to sacrifice academic integrity for short term competitive advantage By forcing colleges into standardized best college hierarchies he argues rankings have threatened the institutional diversity intellectual rigor and social mobility that is the genius of American higher education As a former university administrator who refused to play the game Diver leads his readers on an engaging journey through the mysteries of college rankings admissions financial aid spending policies and academic practices He explains how most dominant college rankings perpetuate views of higher education as a purely consumer good susceptible to unidimensional measures of brand

value and prestige Many rankings he asserts also undermine the moral authority of higher education by encouraging various forms of distorted behavior misrepresentation and outright cheating by ranked institutions The recent Varsity Blues admissions scandal for example happened in part because affluent parents wanted to get their children into elite schools by any means necessary Explaining what is most useful and important in evaluating colleges Diver offers both college applicants and educators a guide to pursuing their highest academic goals freed from the siren song of the best college illusion Ultimately he reveals how to break ranks with a rankings industry that misleads its consumers undermines academic values and perpetuates social inequality

**The European History Highway** Larry N. Gerston, 2007 Understanding federalism the form of political organization that unites separate polities within an overarching political system so that all maintain their political integrity is central to the study of democratic government in the United States Yet many political scientists treat federalism as a set of abstract principles or a maze of budgetary transfers with little connection to real political life This concise and engaging book boils the discussion down to its essence federalism is about power specifically the tug for power among and within the various levels of government Author

*Class Matters* Richard D Kahlenberg, 2025-03-25 A powerful argument for a class based approach to college admissions that shows where we have gone wrong so far and how we will get to justice equality and even diversity for real John McWhorter For decades America's colleges and universities have been working to increase racial diversity But they have been using the wrong approach as Richard Kahlenberg persuasively shows in his highly personal and deeply researched book Kahlenberg makes the definitive case that class disadvantage rather than race should be the determining factor for how a broader array of people get in While elite universities claim to be on the side of social justice the dirty secret of higher education is that the perennial focus on racial diversity has provided cover for an admissions system that mostly benefits the wealthy and shuts out talented working class students By fixing the class bias in college admissions we can begin to rectify America's skyrocketing economic inequality and class antagonism giving more people a better place at the table as they move through life and more opportunity to swim in the river of power Kahlenberg has long worked with prominent civil rights leaders on housing and school integration But his recognition of class inequality in American higher education led to his making a controversial decision to go over to the other side and provide research and testimony in cases that helped lead to the controversial

Supreme Court decision of 2023 that ended racial preferences That conservative ruling could Kahlenberg shows paradoxically have a progressive policy outcome by cutting a new path for economic and racial diversity alike and greater fairness     *Break the MBA Admissions Barrier* Mohit Jain,Jain/harindran,2007-09 As Students Have Started Aspiring For An Mba Degree From The Best B Schools Of The World Looking Beyond The Iims The Number Of Applicants Per Year For International Mba Programmes Has Increased Considerably Therefore It Is Necessary To Present One S Application In Such A Way So As To Stand Out Of The Multitude Successfully Managing The Admissions Process Application Requirements And Arrangements Is Challenging And Demands Judicious Planning
