**United States Congressional Serial Set Catalog** ,1995      **Taxation in a Global Digital Economy** Ina Kerschner,Maryte Somare,2017-10-04 Time to discuss anti BEPS measures around digitalization In the course of the BEPS Report on Action 1 it was concluded that there was no instantaneous need for specific rules to address base erosion and profit shifting BEPS made possible by the digitalization of enterprises and new digital businesses At the same time it was acknowledged that general measures may not suffice with the assessment of results to begin in 2020 While awaiting possible fundamental reforms of the tax framework it is time to discuss anti BEPS measures bearing in mind the peculiar features of the digital economy such as increased mobility no need for physical presence and dematerialization The Book focuses on five key areas of interest International Tax PolicyTax Treaty LawTransfer PricingIndirect Taxation IssuesEU Law Taxation in a Global Digital Economy analyses the issues and addresses the five key areas of interest from various viewpoints      *News* ,1975      **Review of Minamata Convention initial assessment reports** ,2022-01-21      Preventing Chemical Weapons Michael Crowley,Malcolm Dando,Lijun Shang,2018-08-20 The life and chemical sciences are in the midst of a period of rapid and revolutionary transformation that will undoubtedly bring societal benefits but also have potentially malign applications notably in the development of chemical weapons Such concerns are exacerbated by the unstable international security environment and the changing nature of armed conflict which could fuel a desire by certain States to retain and use existing chemical weapons as well as increase State interest in creating new weapons whilst a broader range of actors may seek to employ diverse toxic chemicals as improvised weapons Stark indications of the multi faceted dangers we face can be seen in the chemical weapons attacks against civilians and combatants in Iraq and Syria and also in more targeted chemical assassination operations in Malaysia and the UK Using a multi disciplinary approach and drawing upon an international group of experts this book analyses current and likely near future advances in relevant science and technology

assessing the risks of their misuse The book examines the current capabilities limitations and failures of the existing international arms control and disarmament architecture notably the Chemical Weapons Convention in preventing the development and use of chemical weapons Through the employment of a novel Holistic Arms Control methodology the authors also look beyond the bounds of such treaties to explore the full range of international law international agreements and regulatory mechanisms potentially applicable to weapons employing toxic chemical agents in order to develop recommendations for more effective routes to combat their proliferation and misuse A particular emphasis is given to the roles that chemical and life scientists health professionals and wider informed activist civil society can play in protecting the prohibition against poison and chemical weapons and in working with States to build effective and responsive measures to ensure that the rapid scientific and technological advances are safeguarded from hostile use and are instead employed for the benefit of us all

**Substance in International Tax Law** Florian Navisotschnigg, 2022-08-09 The notion of substance is proving to be central to the OECD s base erosion and profit shifting BEPS project particularly in the area of taxation of intangibles In this book this notoriously hard to define concept is examined from three distinct angles transfer pricing DEMPE Approach harmful tax practices Substantial Activity Requirement and tax treaties Beneficial Ownership In a thoroughgoing investigation using the practical example of an IP company the author provides detailed and precise answers to the following questions What substance is necessary to be entitled to intangible related returns What substance is necessary to benefit from preferential IP regimes or no or only nominal tax jurisdictions What substance is necessary to collect royalties free from withholding taxes Given the need to agree on a common understanding of substance in international tax law in order to avoid costly tax disputes this important book is unmatched for the clear light it sheds on the most relevant substance requirements regarding intangibles It will prove invaluable to tax practitioners and in house counsel who are dealing with cross border transactions concerning intangibles

**Cluster Munition Monitor 2012 , Model Tax Convention on Income and on Capital** Organisation for Economic Co-operation and Development.
