Eska, Olav Hackstein, Ronald I. Kim, Jean-François Mondon, 2024-07-03 This volume contains an introductory essay the bibliography of Professor Ringe and nineteen articles on various aspects of historical linguistics composed by current and former colleagues and students at the University of Pennsylvania and a select number of leading scholars in the field based at institutions such as Cornell University Harvard University Oxford University Saarland University University of Georgia University of California at Los Angeles University of Munich and York University The majority of contributions focus upon linguistic phylogenetics the interrelationships among languages Classical linguistics and Germanic linguistics Many of the contributions make contributions to theoretical as well as historical linguistics **The Annotated Works of Henry George: Social Problems and The Condition of Labor** Francis K. Peddle, William S. Peirce, 2020-07-07 This is the first fully annotated edition of Social Problems 1883 and The Condition of Labor 1891 two important works by one of America's most popular social economists Social Problems grew out of a series of articles Henry George 1839 1897 published in Frank Leslie's Illustrated Newspaper titled Problems of Our Times In his passionate journalistic style George described in graphic detail the horrific conditions facing large sections of the American people and how by returning to first principles society could remedy these conditions for current and future generations The Condition of Labor takes the form of an open letter to Pope Leo XIII in response to the pontiff's famous encyclical Rerum Novarum Echoing the religious themes dominant throughout all of his works George argued that poverty is not part of God's natural order and therefore could be eradicated through political action Both Social Problems and The Condition of Labor demonstrate George's deep commitment to the reconciliation of ethics and economics in such a way that makes the world richer ethically and better off economically **Kenneth Goldsmith's Recent Works on Paper** Daniel Morris, 2019-12-09 Kenneth Goldsmith's Recent Works on Paper is the first critical book devoted to Kenneth Goldsmith the acclaimed conceptual

poet pedagogue and provocateur The book's focus is on Capital Wasting Time on the Internet Against Translation and Theory all published within a year of Goldsmith's controversial reading of a poem based on the Michael Brown autopsy report at Brown University in March 2015 These four books address issues of historiography translation pedagogy authorship and celebrity culture Each book serves a retrospective function for an author who is mid career taking stock of his considerable impact on U S and world poetics at the very moment when critics are challenging the ethics of his aesthetic judgment in the wake of the controversy surrounding The Body of Michael Brown The author focuses on how Goldsmith stages and in some cases transforms his metamorphic identity as a post humanist information manager His performance in these four books complicates the current image of him among many critics and fellow poets as one of Hillary Clinton's basket of deplorables who displayed extremely poor judgment while contributing to a culture of racial insensitivity by performing The Body of Michael Brown

Works Righteousness Anna L. Peterson, 2020-10-19 *Works Righteousness* explores the ways that different ethical theories relate to what people actually do Peterson argues that the most dominant philosophical and religious approaches have largely ignored practice assuming that internal mental states are what matter for ethics and that ideas and practices are related in a simple linear fashion However some alternative models including pragmatism Marxism and religious pacifism present a more complex view of the relations between values and practices These traditions show how attention to practices opens up new ways of thinking about moral theory and concrete issues like hate speech euthanasia and climate change

Heresy and Heterotopia in Works by Lawrence Durrell Isabelle Keller-Privat, Anne R. Zahlan, 2025-03-15 *Heresy and Heterotopia in*

Works by Lawrence Durrell Alexandria to Angkor Wat gathers new essays by international scholars who examine heretical concepts and heterotopian counter spaces in Durrell's thought and writing The volume includes studies of texts set in locations from the Mediterranean to Cambodia with spatial focus ranging from the Egypt of The Alexandria Quartet and of Anatole France's *Thaïs* to the scattered locations of The Avignon Quintet with stops along the way for the island books and other treatments of wandering and exile in poetry as well as prose The contributors approach Durrell's texts from a variety of perspectives philosophical and intertextual architectural and historical mystical and digital In so doing they expose the deeper echoes set off by his wide ranging literary production and map out the metaphysical literary and aesthetic connections that account for Durrell's impact on our understanding of those twentieth century social and cultural paradigms that foreshadow the disruptions of today's world *Expressivity in European Languages* Jeffrey P. Williams, 2023-09-07

There is an emerging perspective in the discipline of linguistics that takes expressivity as one of the key components of human communication and grammatical structure Expressivity refers to the use of grammar in natural languages to convey sensory information in a creative way for example through reduplication iconicity ideophones and onomatopoeia Expressives are more commonly associated with non European languages so their presence in European languages has so far been under documented With contributions from a team of leading scholars this pioneering book redresses that balance by providing copious detailed information about the expressive systems of a set of European languages It comprises a collection of original surveys of expressivity in languages as diverse as Hungarian Finnish Turkish Scots German Greek Italian Catalan Breton and Basque all with the common goal of challenging structuralist assumptions about the role of syntax and showing how expressivity is both typologically diverse and universal *Handbook of Research on Advanced Applications of Graph Theory in Modern Society* Pal, Madhumangal, Samanta, Sovan, Pal, Anita, 2019-08-30 In the world of mathematics and computer science technological advancements are constantly being researched and applied to ongoing issues Setbacks in social networking engineering and automation are themes that affect everyday life and researchers have been looking for new techniques in which to solve these challenges Graph theory is a widely studied topic that is now being applied to real life problems The Handbook of Research on Advanced Applications of Graph Theory in Modern Society is an essential reference source that discusses recent developments on graph theory as well as its representation in social networks artificial neural networks and many complex networks The book aims to study results that are useful in the fields of robotics and machine learning and will examine different engineering issues that are closely related to fuzzy graph theory Featuring research on topics such as artificial neural systems and robotics this book is ideally designed for mathematicians research scholars practitioners professionals engineers and students seeking an innovative overview of graph theory **Prolegomenon to a Theory of Argument Structure** Ken Hale, Samuel Jay Keyser, 2002-10-11 This work is the culmination of an eighteen year collaboration between Ken Hale and Samuel Jay Keyser on the study of the syntax of lexical items It examines the hypothesis

that the behavior of lexical items may be explained in terms of a very small number of very simple principles In particular a lexical item is assumed to project a syntactic configuration defined over just two relations complement and specifier where these configurations are constrained to preclude iteration and to permit only binary branching The work examines this hypothesis by methodically looking at a variety of constructions in English and other languages **Nature** Marie

Addyman,2021 A journey through texts on about or reflecting our experience of the natural world **Nobody's Business**

Brian M. Reed,2013-08-15 Since the turn of the new millennium English language verse has entered a new historical phase but explanations vary as to what has actually happened and why What might constitute a viable avant garde poetics in the aftermath of such momentous developments as 9 11 globalization and the financial crisis Much of this discussion has taken place in ephemeral venues such as blogs e zines public lectures and conferences Nobody s Business is the first book to treat the emergence of Flarf and Conceptual Poetry in a serious way In his engaging account Brian M Reed argues that these movements must be understood in relation to the proliferation of digital communications technologies and their integration into the corporate workplace Writers such as Andrea Brady Craig Dworkin Kenneth Goldsmith Danny Snelson and Rachel Zolf specifically target for criticism the institutions skill sets and values that make possible the smooth functioning of a postindustrial globalized economy Authorship comes in for particular scrutiny how does writing a poem differ in any meaningful way from other forms of content providing While often adept at using new technologies these writers nonetheless choose to explore anachronism ineptitude and error as aesthetic and political strategies The results can appear derivative tedious or vulgar they can also be stirring compelling and even sublime As Reed sees it this new generation of writers is carrying on the Duchampian practice of generating antiart that both challenges prevalent definitions of art and calls into question the legitimacy of the institutions that define it **Identity** Florian Coulmas,2019-02-15 Identity has become one of

the most widely used terms today appearing in many different contexts Anything and everything has an identity and identity crises have become almost equally pervasive Yet identity is extremely versatile meaning different things to different people and in different scientific disciplines To many its meaning seems self evident since its various uses share common features so often the term is used without a definition of what exactly is meant by it This provokes the core question What exactly is identity In this Very Short Introduction Florian Coulmas provides a survey of the many faces of the concept of identity and discusses its significance and varied meanings in the fields of philosophy sociology and psychology as well as politics and law Tracing our concern with identity to its deep roots in Europe s intellectual history individualism and the felt need to draw borderlines Coulmas identifies the most important features used to mark off individual and collective identities and demonstrates why they are deemed important He concludes with a glimpse at the many ways in which literature has engaged with problems of identity throughout history ABOUT THE SERIES The Very Short Introductions series from Oxford University Press contains hundreds of titles in almost every subject area These pocket sized books are the perfect way to get

ahead in a new subject quickly Our expert authors combine facts analysis perspective new ideas and enthusiasm to make interesting and challenging topics highly readable *A Culture of Growth* Joel Mokyr,2018-06-12 Why Enlightenment culture sparked the Industrial Revolution During the late eighteenth century innovations in Europe triggered the Industrial Revolution and the sustained economic progress that spread across the globe While much has been made of the details of the Industrial Revolution what remains a mystery is why it took place at all Why did this revolution begin in the West and not elsewhere and why did it continue leading to today s unprecedented prosperity In this groundbreaking book celebrated economic historian Joel Mokyr argues that a culture of growth specific to early modern Europe and the European Enlightenment laid the foundations for the scientific advances and pioneering inventions that would instigate explosive technological and economic development Bringing together economics the history of science and technology and models of cultural evolution Mokyr demonstrates that culture the beliefs values and preferences in society that are capable of changing behavior was a deciding factor in societal transformations Mokyr looks at the period 1500 1700 to show that a politically fragmented Europe fostered a competitive market for ideas and a willingness to investigate the secrets of nature At the same time a transnational community of brilliant thinkers known as the Republic of Letters freely circulated and distributed ideas and writings This political fragmentation and the supportive intellectual environment explain how the Industrial Revolution happened in Europe but not China despite similar levels of technology and intellectual activity In Europe heterodox and creative thinkers could find sanctuary in other countries and spread their thinking across borders In contrast China s version of the Enlightenment remained controlled by the ruling elite Combining ideas from economics and cultural evolution *A Culture of Growth* provides startling reasons for why the foundations of our modern economy were laid in the mere two centuries between Columbus and Newton **The College Buzz Book** ,2006-03-23 In this new edition Vault publishes the entire surveys of current students and alumni at more than 300 top undergraduate institutions as well as the schools responses to the comments Each 4 to 5 page entry is composed of insider comments from students and alumni as well as the schools responses to the comments *Journal of Information Science* ,2003 Principles practice *The Business School Buzz Book* Vault Editors,2006-02-07 In this new edition Vault publishes the entire surveys of current students and alumni at more than 100 top business schools Each 4 to 5 page entry is composed of insider comments from students and alumni as well as the school s responses to the comments *Woven Shades of Green* Tim Wenzell,2019-08-09 *Woven Shades of Green* is an annotated selection of literature by authors who focus on the natural world and the beauty of Ireland It begins with the Irish monks and their largely anonymous nature poetry written at a time when Ireland was heavily forested A section follows devoted to the changing Irish landscape through both deforestation and famine including the nature poetry of William Allingham and James Clarence Mangan essays from Thomas Gainford and William Thackerary and novel excerpts from William Carleton and Emily Lawless The anthology then turns to the nature literature of the Irish Literary Revival including

Yeats and Synge and an excerpt from George Moore's novel *The Lake* Part four shifts to modern Irish nature poetry beginning with Patrick Kavanaugh and continuing with the poetry of Seamus Heaney Eavan Boland and others Finally the anthology concludes with a section on various Irish naturalist writers and the unique prose and philosophical nature writing of John Moriarty followed by a comprehensive list of environmental organizations in Ireland which seek to preserve the natural beauty of this unique country Published by Bucknell University Press Distributed worldwide by Rutgers University Press
