**Digital Technologies and Learning in Physical Education** Ashley Casey, Victoria A. Goodyear, Kathleen M. Armour, 2016-11-10 There is evidence of considerable growth in the availability and use of digital technologies in physical education Yet we have scant knowledge about how technologies are being used by teachers and whether or how these technologies are optimising student learning This book makes a novel contribution by focusing on the ways in which teachers and teacher educators are attempting to use digital technologies in PE The book has been created using the innovative pedagogical cases framework Each case centres on a narrative written by a PE practitioner explaining how and why technology is used in their practice to advance and accelerate learning Each practitioner narrative is then analysed by a team of experts from different disciplines The aim is to offer a multi dimensional understanding of the possibilities and challenges of supporting young people s learning with digital technologies Each case concludes with a practitioner reflection to illustrate the links between theory research and practice Digital Technologies and Learning in Physical Education encourages critical reflection on the use of technologies in PE It is an essential resource for students on physical education kinesiology or sport science courses

practitioners working in PE or youth sport and researchers interested in digital technologies and education

**Slow Death by Rubber Duck** Rick Smith, Bruce Lourie, 2010-04-06 Funny thought provoking and incredibly disturbing Slow Death by Rubber Duck reveals that just the living of daily life creates a chemical soup inside each of us Pollution is no longer just about belching smokestacks and ugly sewer pipes now it s personal The most dangerous pollution has always come from commonplace items in our homes and workplaces Smith and Lourie ingested and inhaled a host of things that surround all of

us all the time This book exposes the extent to which we are poisoned every day of our lives For this book over the period of a week the kind of week that would be familiar to most people the authors use their own bodies as the reference point and tell the story of pollution in our modern world the miscreant corporate giants who manufacture the toxins the weak kneed government officials who let it happen and the effects on people and families across the globe Parents and concerned citizens will have to read this book Key concerns raised in *Slow Death* by Rubber Duck Flame retardant chemicals from electronics and household dust polluting our blood Toxins in our urine caused by leaching from plastics and run of the mill shampoos toothpastes and deodorant Mercury in our blood from eating tuna The chemicals that build up in our body when carpets and upholstery off gas Ultimately hopeful the book empowers readers with some simple ideas for protecting themselves and their families and changing things for the better

*Needy Media* Stephen Monteiro, 2025-09-16 What makes our portable networked personal media devices smartphones tablets smartwatches so irresistible Reacting to our touch voice or gaze seizing and keeping our attention with sounds vibrations and screen prompts these objects construct an animated intimacy that builds trust and emotional dependence Needy Media explores how features such as face recognition awareness sensors and touchscreens have developed and intersected tying them to key concepts of psychology language and the body Surveying products and practices across a half century Stephen Monteiro argues that the appeal is as much about how media devices behave as it is about the information they convey Monteiro traces a symbiotic overreliance a neediness between users and devices fostered by personalized aspects of digital materiality The physical and emotional bonds that emerge he argues not only cast our devices as loyal companions adaptable to our needs and idiosyncrasies they also facilitate the corporate harvesting of massive amounts of personal data in the name of making technology more friendly intuitive and individualized Raising important questions about

privacy and power Needy Media seeks answers in the complex and sensitive relationship between interface and body a coupling that makes the networked object both an essential psychological presence and a lingering concern for our sense of self

**Anthro-Vision** Gillian Tett, 2021-06-08 While today s business world is dominated by technology and data analysis award winning financial journalist and anthropology PhD Gillian Tett advocates thinking like an anthropologist to better understand consumer behavior markets and organizations to address some of society s most urgent challenges Amid severe digital disruption economic upheaval and political flux how can we make sense of the world Leaders today typically look for answers in economic models Big Data or artificial intelligence platforms Gillian Tett points to anthropology the study of human culture Anthropologists learn to get inside the minds of other people helping them not only to understand other cultures but also to appraise their own environment with fresh perspective as an insider outsider gaining lateral vision Today anthropologists are more likely to

study Amazon warehouses than remote Amazon tribes they have done research into institutions and companies such as General Motors Nestl Intel and more shedding light on practical questions such as how internet users really define themselves why corporate projects fail why bank traders miscalculate losses how companies sell products like pet food and pensions why pandemic policies succeed or not Anthropology makes the familiar seem unfamiliar and vice versa giving us badly needed three dimensional perspective in a world where many executives are plagued by tunnel vision especially in fields like finance and technology Fascinating and surprising Fareed Zararia CNN Anthro Vision offers a revolutionary new way for understanding the behavior of organizations individuals and markets in today s ever evolving world
