Applied Mathematics in Engineering and Reliability Radim Bris, Václav Snášel, Chu Duc Khanh, Phan Dao, 2016-04-12 Applied Mathematics in Engineering and Reliability contains papers presented at the International Conference on Applied Mathematics in Engineering and Reliability ICAMER 2016 Ho Chi Minh City Viet Nam 4-6 May 2016

The book covers a wide range of topics within mathematics applied in reliability risk and engineering including Risk and Relia

Stock-Flow-Consistent Models and Institutional Variety Romar Correa, Amelia Correa, 2019-02-15 Orthodox macroeconomics is founded on microeconomics Heterodox economists either reject micro foundations or experiment with behavioural relationships without paying attention to the principles that generate them The book takes off from Michal Kalecki s aphorism about economics being a science that confused stocks and flows Kalecki was famous for presiding over a marriage between Marx and Keynes and all three figure prominently in the volume However the first part of the title is a homage to Wynne Godley who pioneered stock flow consistent modeling in our times The authors exploit lagged values of variables emerging from the definitions Lags also emerge in so called stock flow norms connecting the aggregates Some moving and shaking of identities and a difference or differential equation emerges The requirements for stability of the dynamic systems are illuminating and the reader can stop at structure and history with the first half of the book The conversation with orthodoxy begins with the second part The equivalent equation systems of the first part throw up different pairs of characters whose happiness must be maximised over time The price to pay through the solution process is the confrontation with many ugly expressions but the explicit calculations are undertaken repeatedly only to reassure students through drillwork that tedium is not the same as difficulty The payoffs are that variable transitions in capitalism the second part of the title are captured from a small clutch of identities The movements from backward agriculture to capitalism from golden age capitalism to financialization are modeled A separate chapter is devoted to Europe The policy prescriptions of heterodox economics do not compare with the richness of critique and positive analysis Positive and normative are one in this work the combination of stock flow norms along with forgotten policy variables like the tax rate promising order and stability to economies

Operations Management for Healthcare Jan Vissers, Sylvia Elkhuisen, Nathan Proudlove, 2022-11-25 This fully updated edition of the bestselling textbook on Health Service Operations Management provides an invaluable reference for students and researchers in the fields of healthcare management operations management and patient flow logistics Featuring theoretical frameworks and a comprehensive set of practical case studies this book also covers subjects such as hospital planning and supply chain management in healthcare quality assurance and performance management Healthcare

managers work together with healthcare professionals in a multitude of challenging scenarios Trade offs have to be made between waiting times for customers and efficient use of scarce resources between quality of care and quality of services between the perspective of a single pathway and the total system and between the perspective of a single provider and that of a network of providers working together in the chain of primary care hospitals nursing homes and home care This book guides healthcare students and professionals through a set of practical tools and resources ranging from simple queueing models to more complicated analytical models to help address these issues The book can be used at an undergraduate level by introducing concepts definitions and approaches and at a postgraduate level through the application of approaches to operations management problems in healthcare practice It will serve as a primary textbook for a health service operations management course module in a Master s program on healthcare management

Cross-Lingual Word Embeddings Anders Søgaard, Ivan Vulić, Sebastian Ruder, Manaal Faruqi, 2022-05-31 The majority of natural language processing NLP is English language processing and while there is good language technology support for standard varieties of English support for Albanian Burmese or Cebuano and most other languages remains limited Being able to bridge this digital divide is important for scientific and democratic reasons but also represents an enormous growth potential A key challenge for this to happen is learning to align basic meaning bearing units of different languages In this book the authors survey and discuss recent and historical work on supervised and unsupervised learning of such alignments Specifically the book focuses on so called cross lingual word embeddings The survey is intended to be systematic using consistent notation and putting the available methods on comparable form making it easy to compare wildly different approaches In so doing the authors establish previously

unreported relations between these methods and are able to present a fast growing literature in a very compact way Furthermore the authors discuss how best to evaluate cross lingual word embedding methods and survey the resources available for students and researchers interested in this topic

Mathematical Analysis of Continuum Mechanics and Industrial Applications Hiromichi Itou,Masato Kimura,Vladimír Chaloupecký,Kohji Ohtsuka,Daisuke Tagami,Akira

Takada,2016-11-18 This book focuses on mathematical theory and numerical simulation related to various aspects of continuum mechanics such as fracture mechanics elasticity plasticity pattern dynamics inverse problems optimal shape design material design and disaster estimation related to earthquakes Because these problems have become more important in engineering and industry further development of mathematical study of them is required for future applications Leading researchers with profound knowledge of mathematical analysis from the fields of applied mathematics physics seismology engineering and industry provide the contents of this book They help readers to understand that mathematical theory can be applied not only to different types of industry but also to a broad range of industrial problems including materials processes and products

Parametric and Nonparametric Inference for Statistical Dynamic Shape Analysis with Applications Chiara Brombin,Luigi Salmaso,Lara Fontanella,Luigi Ippoliti,Caterina Fusilli,2016-02-11 This book considers specific inferential issues arising from the analysis of dynamic shapes with the attempt to solve the problems at hand using probability models and nonparametric tests The models are simple to understand and interpret and provide a useful tool to describe the global dynamics of the landmark configurations However because of the non Euclidean nature of shape spaces distributions in shape spaces are not straightforward to obtain The book explores the use of the Gaussian distribution in the configuration space with similarity transformations integrated out Specifically it works with the offset normal shape distribution as a probability model for statistical inference on a sample of a temporal sequence of landmark configurations This enables inference for Gaussian processes from configurations onto the shape space The book is divided in two parts with the first three chapters covering material on the offset normal shape distribution and the remaining chapters covering the theory of NonParametric Combination NPC tests The chapters offer a collection of applications which are bound together by the theme of this book They refer to the analysis of data from the FG NET Face and Gesture Recognition Research Network database with facial expressions For these data it may be desirable to provide a description of the dynamics of the expressions or testing whether there is a difference between the dynamics of two facial expressions or testing which of the landmarks are more informative in explaining the pattern of an expression

Higher Education, Community Engagement and Entrepreneurship in Southern Africa I. G. Govender,2021-02-24 This volume explores the pressing issues of entrepreneurship education and development in Southern Africa It discusses the various roles of higher education institutions in enhancing entrepreneurship in localised communities and provides a systematic solution for improving the Southern African economy by realising the importance of empowering the youth with entrepreneurial skills In addition successful development requires

effective policies and contemporary approaches to both community engagement and entrepreneurship management The book uses different Southern African case studies to discuss the various issues and innovations in entrepreneurship in the country

Diagonalizing Quadratic Bosonic Operators by Non-Autonomous Flow Equations Volker Bach,Jean-Bernard Bru,2016-03-10 The authors study a non autonomous non linear evolution equation on the space of operators on a complex Hilbert space They specify assumptions that ensure the global existence of its solutions and allow them to derive its asymptotics at temporal infinity They demonstrate that these assumptions are optimal in a suitable sense and more general than those used before The evolution equation derives from the Brockett Wegner flow that was proposed to diagonalize matrices and operators by a strongly continuous unitary flow In fact the solution of the non linear flow equation leads to a diagonalization of Hamiltonian operators in boson quantum field theory which are quadratic in the field

Time Series with Mixed Spectra Ta-Hsin Li,2016-04-19 Time series with mixed spectra are characterized by hidden periodic components buried in random noise Despite strong interest in the statistical and signal processing communities no book offers a comprehensive and up to date treatment of the subject Filling this void Time Series with Mixed Spectra focuses on the methods and theory for the stati

Unleashing Growth and Strengthening Resilience in the Caribbean Mr.Krishna Srinivasan,Ms.Inci Otker,Ms.Uma Ramakrishnan,Mr.Trevor Serge Coleridge Alleyne,2017-11-13 This book provides a diagnosis of the central economic and financial challenges facing Caribbean policymakers and offers broad policy recommendations for promoting a sustained and inclusive increase in economic well being The analysis highlights the need for Caribbean economies to make a concerted effort to break the feedback loops between weak macroeconomic fundamentals notably pertaining to fiscal positions and financial sector strains and structural impediments such as high electricity costs limited financial deepening violent crime and brain drain which have depressed private investment and growth A recurring theme in the book is the need for greater regional coordination in finding solutions to address the Caribbean s shared and intertwined macroeconomic and structural challenges The analysis suggests that strengthening regional and global market integration of Caribbean economies would provide an impetus to sustained growth in incomes and jobs Greater regional and global economic integration would also facilitate structural transformation and a shift toward new economic activities resulting in more diversified and less vulnerable economies A central challenge for the Caribbean is thus to come together as a region overcome the limitations posed by size and garner the benefits of globalization Efforts should build on existing regional arrangements accelerating progress in implementing these agreements would stimulate trade Policymakers could also promote deeper integration with Latin America and the rest of the world by pursuing new trade agreements leveraging current agreements more effectively or deepening them to include areas beyond traditional trade issues and developing port and transport infrastructure
