Brown, 2019-08-15 This powerful edited collection disrupts the deficit oriented discourses that currently frame the field of early childhood education ECE and illuminates avenues for critique and opportunities for change Researchers from across the globe offer their insight and expertise in challenging the logic within ECE that often frames children and their families through gaps risks and deficits across such issues as poverty language developmental psychology teaching and learning Chapters propose practical responses to these manufactured crises and advocate for democratic practices and policies that

enable ECE programs to build on the wealth of cultural and personal knowledge children and families bring to the early learning process. Moving beyond a dependence on deficits, this book offers opportunities for scholars, researchers, and students to consider their practices in early education and develop their understanding of what it means to be an educator who seeks to support all children.

Are Our Children Ready to Learn? United States. Congress. Senate. Committee on Labor and Human Resources, 1999. These hearing transcripts present testimony before the Committee on Labor and Human Resources of the 105th Congress on early childhood education and related services. Participants provided different perspectives on early education focusing on the academic achievement of American students especially in comparison to students in other countries, the importance of early childhood longitudinal studies, the role of child care centers and improving early childhood educators' qualifications. Speakers included Senators James Jeffords (Vermont), Tim Hutchinson (Arkansas), Susan Collins (Maine), and Jack Reed (Rhode Island). Providing expert testimony were the commissioner of the National Center for Education Statistics and the executive director of the Child Care Action Campaign. Witnesses indicated that basic measures from the National Household Education Survey document tremendous variation in the skills children bring to kindergarten. Studies of child care in the United States report that the vast majority of centers provide poor to mediocre care. One participant compared U.S. child care programs to early education programs in France, noting differences in caregiver qualifications and compensation as well as other programmatic differences. This witness also recommended accelerating the move toward universal prekindergarten programming and increasing accreditation efforts. A report on data needs for early childhood development and learning readiness is appended.
