Office of Education, 1960 **Intermediate Algebra for College Students** Prentice-Hall Staff, 1999-08 Learning Abstract Algebra with ISETL Ed Dubinsky, Uri Leron, 1994 Most students in abstract algebra classes have great difficulty making sense of what the instructor is saying Moreover this seems to remain true almost independently of the quality of the lecture This book is based on the constructivist belief that before students can make sense of any presentation of abstract mathematics they need to be engaged in mental activities which will establish an experiential base for any future verbal explanation No less they need to have the opportunity to reflect on their activities This approach is based on extensive theoretical and empirical studies as well as on the substantial experience of the authors in teaching abstract algebra The main source of activities in this course is computer constructions specifically small programs written in the mathlike programming language ISETL the main tool for reflections is work in teams of 2-4 students where the activities are discussed and debated Because of the similarity of ISETL expressions to standard written mathematics there is very little programming overhead learning to program is inseparable from learning the mathematics Each topic is first introduced

through computer activities which are then followed by a text section and exercises This text section is written in an informed discursive style closely relating definitions and proofs to the constructions in the activities Notions such as cosets and quotient groups become much more meaningful to the students than when they are presented in a lecture **ACT Advanced Practice: Prep for 36** Kaplan Test Prep, 2017-09-05 If you're looking to get a top score on the ACT Kaplan's ACT Advanced Practice workbook has the high difficulty practice and expert strategies you need to face the toughest questions with confidence Kaplan Test Prep is the Official Partner for Live Online Prep for the ACT For more information visit kaptest.com onlinepreplive Essential Practice 9 practice sets with advanced high difficulty questions to help you score the most points More than 600 questions with detailed answers and explanations Kaplan's exclusive score raising strategies and methods to show you the best way to attack the most difficult ACT questions Comprehensive review of all sections on the test Expert Guidance Kaplan's expert teachers make sure our tests are true to the ACT 9 out of 10 Kaplan students get into one or more of their top choice colleges Rewriting Techniques and Applications Tobias Nipkow, 2006-06-08 This book constitutes the refereed proceedings of the 9th International Conference on Rewriting Techniques and Applications RTA 98 held in Tsukuba Japan in March April 1998 The 22 revised full papers presented were carefully selected from a total of 61 submissions by the program committee with the assistance of 113 additional referees The book covers all current aspects of rewriting including rewriting systems term rewriting string rewriting theorem proving resolution normalization unification equational logics lambda calculus constraint solving and functional programming Essential Primary Mathematics Caroline Rickard, 2013-05-16 If you are teaching or learning to teach primary mathematics this is the toolkit to support you Not only does it cover the essential knowledge and understanding that you and your pupils need to know it also offers 176 great ideas for teaching primary mathematics adaptable for use within different areas of mathematics and for different ages and abilities Tackling children's misconceptions in each topic area and differentiation through open ended tasks and elements of choice the book encourages you to think deeply about the teaching of the primary mathematics curriculum The classroom activities which are simple to resource and use support you in meeting the Teachers Standards securely and encourage children to Think deeply about mathematics and to challenge themselves Develop mathematical independence Engage in mathematical talk Work collaboratively with others to further understanding Whether you are just getting started in your teaching career or more experienced you will find a wealth of innovative activities to support you in teaching primary mathematics in effective and creative ways This book is an absolute must for every primary teacher The perfect blend of subject knowledge common misconceptions pupil activities and self assessment questions will support all those who are feeling slightly less than confident about teaching a mathematical topic Sue Davis Primary PGCE Course Leader and Lecturer in Mathematics Education University of Leicester UK This book has the conversational style of an excellent mentor and or tutor of primary mathematics It offers advice and guidance on how to be an effective teacher of mathematics whilst still
