Higher-Order Perl Mark Jason Dominus, 2005-03-31 Most Perl programmers were originally trained as C and Unix programmers so the Perl programs that they write bear a strong resemblance to C programs However Perl incorporates many features that have their roots in other languages such as Lisp These advanced features are not well understood and are rarely used by most Perl programmers but they are very powerful They can automate tasks in everyday programming that are difficult to solve in any other way One of the most powerful of these techniques is writing functions that manufacture or modify other functions For example instead of writing ten similar functions a programmer can write a general pattern or framework that can then create the functions as needed according to the pattern For several years Mark Jason Dominus has worked to apply functional programming techniques to Perl Now Mark brings these flexible programming methods that he has successfully taught in numerous tutorials and training sessions to a wider audience Introduces powerful programming methods new to most Perl programmers that were previously the domain of computer scientists Gradually builds up confidence by describing techniques of progressive sophistication Shows how to improve everyday programs and includes numerous engaging code examples to illustrate the methods

NERD III - New Experimental Research in Design Tom Bieling, Michelle Christensen, Florian Conradi, 2025-05-06 Design has long established itself as an independent research competence The New Experimental Research in Design NERD series seeks to provide a public platform to reflect upon and discuss the specifically experimental dimension of the field The contributions from researchers from around the world exhibit a diverse and insightful range of approaches giving rise to further debate and action in the rapidly evolving field In times of multiple crises the authors in this volume strive to find tactics of response They introduce experiments into more than human design co species production critical algorithmic immersion feminist engagements with new materialism and more From autoethnographic explorations to socially engaged methods they challenge not just the role of design in these times but the self positioning of the designer Experimental design Practice based research Design methods

Anything Goes Carl Douglass, 2015-09-30 Anything Goes finds Garven Wilson hulme a boyish prankster champion college wrestler and sociopathic driven competitor struggling his way to the pinnacle of success in his university life There is nothing he will not do to get into medical school nothing He is willing to use his friends destroy his enemies lie cheat and steal to get there if that is what it takes Anything Goes is the story of how that success is achieved and at what cost to himself to his family and even to his friends That cost includes alienating the most prominent professor at Stanford which is only the beginning of his willingness to take on all comers
