Population Cheryl Kruschke,2018-02-26 This textbook fills a gap in education for licensed practical nurses LPN providing
 information specific to their own needs and concerns Firstly it clarifies the leadership role of LPNs in the healthcare setting
 and then identifies the knowledge skills and abilities related to leadership management communication culture change and
 person directed care concepts It also explains the efficacy of these concepts related to the LPN care of patients in the work
 setting and reviews the Nurse Practice Act NPA enacted in every US state LPNs play an essential role in the patient care
 team and we have to ensure they receive advanced education as practitioners in healthcare settings that reach vulnerable
 populations such the elderly They have been considered as the registered nurses right hand in acute care as well as many
 home health settings They provide basic medical and nursing care ensure the comfort of patients discuss health care with
 patients and report the status of patients to registered nurses and doctors But the LPNs are often expected to take on a real
 leadership role based on the perception that as licensed nurses they already have all the qualifications and education
 necessary for leadership roles However there is a gap in the education they receive and a limited body of literature dedicated
 to them Written in honor of all LPNs this educational textbook fills that gap With learning objectives review questions and
 scenarios it is a valuable resource for courses for undergraduate students training to be LPNs **Texas Register** Texas.
