when he measures up to all its qualifications Such an engineer is one who in in the majority of cases not only knows what to do in the case of an electrical trouble but just how to proceed to do that particular thing and who seldom guesses without a good percentage of the probabilities of being right in his favor The main difference between the designer and the repairman is that the former must know what to do while the latter must know how to do it A capable repairman combines both qualifications through years of experience When called upon to locate troubles in motors and generators electricians and repairmen whose experience in this kind of work has been limited often find themselves wondering just what to do first It is from just this viewpoint that the information on winding procedure and the hunting and correcting of troubles has been presented That is instead of discussing the fundamentals involved in any method of working out a repair problem the actual problem or job as the case may be is discussed from the how to do it standpoint About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
