Corpus Stylistics in Heart of Darkness and its Italian Translations Lorenzo Mastropierro, 2017-11-16 This book explores the interaction between corpus stylistics and translation studies It shows how corpus methods can be used to compare literary texts to their translations through the analysis of Joseph Conrad's Heart of Darkness and four of its Italian translations The comparison focuses on stylistic features related to the major themes of Heart of Darkness By combining quantitative and qualitative techniques Mastropierro discusses how alterations to the original's stylistic features can affect the interpretation of the themes in translation The discussion illuminates the manipulative effects that translating can have on the reception of a text showing how textual alterations can trigger different readings This book advances the multidisciplinary dialogue between corpus linguistics and translation studies and is a valuable resource for students and researchers interested in the application of corpus approaches to stylistics and translation

the sex trade offers insight into the social position of women in history Creation Language in Romans 8 Gregory P. Fewster, 2013-04-04 Modern scholarship tends to understand Paul's use of creation language in Rom 8:18-23 as part of a commentary on the state of sub-human creation. This misguided position warrants an inquiry into the state of lexical study in New Testament scholarship. As a result, Fewster articulates a theory of lexical monosemy cast in the framework of Systemic Functional Linguistics. The model is applied to Paul's use of through a robust corpus analysis and investigation into the word's role within the paragraph contributes to the cohesive structure of Rom 8:18-23 and contra the majority of interpreters functions as a metaphor for the human body.

Using Corpora to Learn about Language and Discourse Linda Lombardo, 2009 Considerable progress has been made in the use of corpora for research purposes to describe language in use and more recently through a CADS corpus-assisted discourse studies approach to identify the discourse features of specific text genres. While the potential benefits of working with corpora in the classroom have been recognised, there has been a lag in the promulgation of guidelines for carrying out meaningful corpus work with language learners and teachers in mind. The papers in this volume aim to make a contribution toward filling that gap by providing an in-depth account of innovative corpus work, most of which has actually been carried out with real learners in the classroom. Authors provide valuable insights into ways of structuring corpus work for specific target learners as well as suggestions for resolving problematic issues that have arisen and avoiding errors that have been made with learners and in their own research and experimentation. The transparency and honesty with which they present their methodology and results, along with the successful techniques they have developed, constitute a step forward in defining good and bad practice in the use of corpora in learning.

The Language of Pop Culture Valentin Werner, 2018-01-17 This collection brings together contributions from both leading and emerging scholars in one comprehensive volume to showcase the richness of linguistic approaches to the study of pop culture and their potential to inform linguistic theory building and analytical frameworks. The book features examples from a dynamic range of pop culture registers, including lyrics, the language of fictional TV series, comics, and musical subcultures, as a means of both providing a rigorous and robust description of these forms through the lens of linguistic study but also in outlining methodological issues involved in applying linguistic approaches. The volume also explores the didactic potential of pop culture, looking at the implementation of pop culture traditions in language learning settings. This collection offers unique insights into the interface of linguistic study and the broader paradigm of pop culture scholarship, making this an ideal resource for graduate students and researchers in applied linguistics, English language, media studies, cultural studies, and discourse analysis.
