Middle School Mathematics Sergei Abramovich, Michael L. Connell, 2021-05-10 This textbook is for prospective teachers of middle school mathematics. It reflects on the authors' experience in offering various mathematics education courses to prospective teachers in the US and Canada. In particular, the content can support one or more of 24 semester-hour courses recommended by the Conference Board of the Mathematical Sciences 2012 for the mathematical preparation of middle school teachers. The textbook integrates grade-appropriate content on all major topics in the middle school mathematics curriculum with international recommendations for teaching the content, making it relevant for a global readership. The textbook emphasizes the inherent connections between mathematics and real life, since many mathematical concepts and procedures stem from common sense, something that schoolchildren intuitively possess. This focus on teaching formal mathematics with reference to real life and common sense is essential to its pedagogical approach. In addition, the textbook stresses the importance of being able to use technology as an exploratory tool and being familiar with its strengths and weaknesses. In keeping with this emphasis on the use of technology, both physical manipulatives and digital commonly available educational software, it also explores e.g. the use of computer graphing software for digital fabrication. In closing, the textbook addresses the issue of creativity as a crucial aspect of education in the digital age in general and in mathematics education in particular.

Key Maths Roma Harvey, Gill Hewlett, Elaine Judd, Jo Pavey, 1999 Running parallel to the mainstream Key Maths series, they are paced to support a broad range of lower ability and ESL pupils. Special Resource 9 includes a new certificate Roadway to motivate pupils. SATs Navigator provides additional support for the teacher in preparations and lesson openers and enders to further develop areas of numeracy.

Curriculum Development and Teaching Strategies for Gifted Learners C. June Maker, Shirley W. Schiever, 2010

Methods and Materials for Teaching the Gifted Frances A. Karnes, Suzanne M. Bean, 2021-09-23 The newly revised and updated fourth edition of *Methods and Materials for Teaching the Gifted* is an excellent introduction to gifted education and real-world learning. The chapters of this comprehensive textbook are written by respected leaders in the field of gifted education. The authors review the unique needs of gifted learners and give current information on instructional planning and evaluation strategies for best practices and ongoing enhancement and support of gifted programs. Chapters include topics such as differentiated curricular design, extending learning through research, writing challenging instructional units, and developing leadership skills and innovative thinkers. Instructional practices such as problem-based learning, technology literacy, independent study, simulation, and gaming and more are addressed. A special focus is given to using the Gifted Education Programming Standards and Common Core State Standards. The fourth edition provides updated information on funding sources and public relations strategies for gifted education programs. It also includes updated lists of books, teaching materials, websites, and other resources for teachers of the gifted.
