

Directions: *Work on these sheets.*

Part I: Multiple Choice. *Circle the letter corresponding to the best answer.*

Questions 1 to 3 relate to the following situation.

A sample of 102 drug users was interviewed and each subject was asked to name the kind of drug that each first injected. Here are the results:

<u>First drug injected</u>	<u>Number</u>
Heroin	42
Speed	36
Other	24

- An appropriate null hypothesis is
 - the count of first drug injected is the same for each drug category.
 - $\mu = 34$.
 - at least one of the cell counts is different from the other two.
 - the proportion of first drug injected depends on the type of drug.
 - the 3 cell counts are independent of the type of drug.
- The test statistic, degrees of freedom, and P -value are
 - 4.94, 2, 0.0845.
 - 1.88, 2, 0.391.
 - 2.94, 3, 0.40.
 - 0.118, 2, 0.94.
 - 8.94, 2, 0.011.
- Which of the following is a correct statement? In order to make an inference about the population,
 - the population has to be at least 10 times the size of the sample.
 - the cell counts for our sample have to be approximately the same as the counts for the host population.
 - all observed cell counts have to be positive, and no more than 20% can be less than 15.
 - the sample has to have the same characteristics as the population.
 - the subjects have to be a random sample of drug users.
- Are all employees equally prone to having accidents? To investigate this hypothesis, a researcher looked at a light manufacturing plant and classified the accidents by type and by age of the employee.

<u>Age</u>	<u>Accident Type</u>		
	<u>Sprain</u>	<u>Burn</u>	<u>Cut</u>
Under 25	19	17	5
25 or over	61	13	12

A chi-square test gave a test statistic of 20.78. If we test at $\alpha = 0.05$

- there appears to be no association between accident type and age.
- age seems to be independent of accident type.
- accident type does not seem to be independent of age.
- there appears to be a 20.78% correlation between accident type and age.
- the proportion of sprain, cuts, and burns seems to be similar for both age classes.
