Kalmane, 2012-06-30 Online text visualization tools are a recent phenomenon on the World Wide Web The potential of these tools to improve reading comprehension has not yet been empirically researched Therefore this book investigates if online text visualization tools can help to improve reading comprehension In the empirical research a quasi experimental method was applied The data were collected via tests distributed among the students of an experimental group and a control group

The results of the tests show that both groups improved during the practice on the same topic. However, the students of the experimental group who had training with the tools improved more than the students of the control group. According to the results, the use of text visualization tools helped the students of the experimental group to improve their reading comprehension.

Exploring Language Assessment and Testing Anthony Green, 2020-12-29 The Routledge Introductions to Applied Linguistics series takes an innovative practice to theory approach with a back to front structure. This leads the reader from real world problems and issues through a discussion of intervention and how to engage with these concerns before finally relating these practical issues to theoretical foundations. *Exploring Language Assessment and Testing* offers a straightforward and accessible introduction that starts from real world experiences and uses practical examples to introduce the reader to the academic field of language assessment and testing. Extensively updated with additional features such as reader tasks with extensive commentaries from the author, a glossary of key terms and an annotated further reading section, this second edition provides coverage of recent theoretical and technological developments and explores specific purposes for assessment. Including concrete models and examples to guide readers into the relevant literature, this book also offers practical guidance for educators and researchers on designing, developing and using assessments. Providing an inclusive and impartial survey of both classroom based assessment by teachers and larger scale testing, this is an indispensable introduction for postgraduate and advanced undergraduate students studying Language Education, Applied Linguistics and Language Assessment.

Fundamental Considerations in Technology Mediated Language Assessment Karim Sadeghi, Dan Douglas, 2023-04-27 *Fundamental Considerations in Technology Mediated Language Assessment* aims to address issues such as how the forced integration of technology into second language assessment has shaped our understanding of key traditional concepts like validity, reliability, washback, authenticity, ethics, fairness, test security and more. Although computer assisted language testing has been around for more than two decades in the context of high stakes proficiency testing, much of language testing worldwide has shifted to at home mode and relies heavily on the mediation of digital technology, making its widespread application in classroom settings in response to the COVID 19 outbreak unprecedented. Integration of technology into language assessment has brought with it countless affordances and at the same time challenges both theoretically and practically. One major theoretical consideration requiring attention is the way technology has contributed to a reconceptualization of major assessment concepts and constructs. There is very limited literature available on the theoretical underpinnings of technology mediated language assessment. This book aims to fill this gap. This book will appeal to academic specialists, practitioners or professionals in the field of language assessment, advanced and or graduate students and a range of scholars or professionals in disciplines like educational technology, applied linguistics and teaching English to speakers of other languages (TESOL).

Local Language Testing Xun Yan, Slobodanka Dimova, April Ginther, 2023-07-18 This book describes language testing practices that exist in the intermediate space between large scale

standardized testing and classroom assessment an area that is rarely addressed in language testing literature Drawing empirical research on a variety of languages the volume discusses local language tests ability to represent local contexts and values explicitly and purposefully embed test results within instructional practice and provide data for program evaluation and research Although local testing practices have been grounded in the theoretical principles of language testing the authors in this volume supplement the theoretical content with practical examples of how local tests can be designed to effectively function within and across different institutional contexts Target Score Teacher's Book Charles Talcott, Graham Tullis, 2007-11-15 Target Score Second edition is a preparatory course for the new TOEIC Test Test of English for International Communication Fully revised to meet the needs of the new TOEIC Test this Second edition also provides effective classroom friendly lessons for active communicative English Each of the twelve units focuses on one of the principal recurrent themes of the TOEIC Test presenting contextualised language practice and covering the settings and situations that students find in TOEIC Test questions The Teacher s Book provides instructors with a complete hands on guide to balancing the aims of language teaching with test preparation as well as a range of photocopiable TOEIC Test inspired games and activities It also contains a description of the new TOEIC Test **DATA ANALYTICS AND**

VISUALIZATION GUPTA, GAGAN RAJ, NAGWANI, NARESH KUMAR, 2025-10-07 Today technologies are driven by data and data analytics has become a common routine task in any organization The book focuses on two aspects of handling the data first the data analytics and second the data visualization Data visualization is an important tool to bridge the gap between data and analysis of data It helps in understanding and exploring data and aligning it to the data analysis tasks The book contains the entire range of important and trending topics of Data Analytics and Visualization **KEY FEATURES** Numerical examples of key concepts are provided along with MCQs and exercise questions for each chapter Application oriented case studies are covered for the important topics Advanced topics such as stream data NLP and text data graph data time series analysis are covered to provide research insights on data analytics Graphs plots and other advanced visual objects are presented for demonstration of data visualization and for providing better understanding of data **TARGET AUDIENCE** B E B Tech Students of Computer Science and Engineering Practicing professionals working learning and dealing with data analysis BCA MCA BBA MBA with Data Analytics and Visualization Specialization Praise for the book I found this book to be very interesting and comprehensive It covers both practical and theoretical aspects very well It has several topics that one would not find in standard ML books for example data visualization and data streaming Book also provides real life case studies which students will find quite useful Dr Ashutosh Modi Associate Professor Dept of Computer Science Engineering IIT Kanpur Gagan is that rare teacher who understands what to teach and how to teach it The book reflects his approach to knowledge strong theoretical grounding but lucid commentary on how to put it to practice This book is a must have for students looking to build a comprehensive understanding of Data Analytics and Visualization Prof Brejesh Lall Former Head
