Educational technology is a systematic application of relevant technological processes and resources in teaching with a goal to improve students performance. It involves a disciplined approach to identifying the needs of students applying technology in instructions and tracking their performance. A thickly populated country like India where mass education is the demand of the time, only educational technology is advisable. Software programme like programmed learning material can make mass education easily available. Educational Technology possesses great potential for teaching learning process. It makes curriculum construction and selection of teaching learning strategies easy and also makes teaching learning more effective. Educational Technology helps in improving quality of teaching by providing varied types of programmes through TV and other media. Educational Technology motivates children for learning. It augments motivation among the learner to learn by using various new machines such as video computer tape recorder TV and other different types of projected aid. Educational technology almost eliminating the obstacles of mass instruction. Different types of programmes developed by different experts for a large population of students can be easily communicated. Educational opportunities accessible for all. It breaks the barrier of all classes of learners irrespective of economic social or geographical status and makes education available for all. For example through mass media TV Radio Film etc it makes education easily available for all. It also serves as distance mode of learning. Education Technology makes provision for self instructional materials which provide opportunities to both the gifted and backward children to proceed at his own rate of speed in the learning process.

Mathematics Candia Morgan, Clare Tikly, Anne Watson, 2012-11-12 This accessible and thought provoking book considers what beginning teachers need to know about learning teaching assessment curriculum and professional development in the context of teaching mathematics to eleven to nineteen year olds. It is part of a new series of books that has as its starting point the fact that PGCE students are already subject specialists. The authors show how mathematics teachers can communicate their own enthusiasm for the subject and inspire their pupils to learn and enjoy learning. They provide practical advice which will help teachers and student teachers to plan organize manage and assess classroom work make decisions about the content ordering and level of difficulty of lessons make sense of new subject material and how it contributes to wider educational aims develop professionally by developing the subject as a whole. This is a comprehensive introduction to teaching mathematics in the secondary school which will be invaluable to teachers beginning their careers and those who are training to be mathematics teachers.
