Resources in Education ,1982 *It's Time for Strategic Scheduling* Nathan Levenson,David James,2023-07-03 An accessible guide to creating schedules that amplify school and district priorities support best practices in teaching and learning heighten student engagement and enhance equity A school s schedule can be as important to education outcomes as its budget or strategic plan The secret to making the schedule a tool for school improvement is to approach schedule design not as a technical task centered on making everything fit like Tetris blocks but as a strategic one In this book informed by research and their work with hundreds of schools scheduling experts Nathan Levenson and David James explore how strategic scheduling can turn a good enough schedule into one that supercharges learning and engagement without additional costs or more FTEs If you are ready to Figure out which schedule type is best for your students and staff Disrupt harmful tracking and ensure every student has access to highly skilled teachers and rigorous curriculum Deliver optimum hours of core instruction while expanding electives and providing opportunities for student voice and choice Precisely match staffing to course enrollment to free up personnel and funds for other purposes Find time for critical intervention and enrichment blocks and Communicate scheduling decisions more effectively to parents families and district leaders then it s time for strategic scheduling Offering targeted advice for best practice scheduling at the elementary middle and high school levels this book will help school and district leaders and the teachers and students they serve make the most of every school day and every school year

Forms and Functions of Endings in Narrative Digital Games Michelle Herte,2020-09-16 This book looks closely at the endings of narrative digital games examining their ways of concluding the processes of both storytelling and play in order to gain insight into what endings are and how we identify them in different media While narrative digital games share many representational strategies for signalling their upcoming end with more traditional narrative media such as novels or movies

they also show many forms of endings that often radically differ from our conventional understanding of conclusion and closure From vast game worlds that remain open for play after a story's finale to multiple endings that are often hailed as a means for players to create their own stories to the potentially tragic endings of failure and game over digital games question the traditional singularity and finality of endings Using a broad range of examples this book delves deeply into these and other forms and their functions both to reveal the closural specificities of the ludonarrative hybrid that digital games are as well as to find the core elements that characterise endings in any medium It examines how endings make themselves known to players and raises the question of how well established closural conventions blend with play and a player's effort to achieve a goal As an interdisciplinary study that draws on game studies as much as on transmedial narratology *Forms and Functions of Endings in Narrative Digital Games* is suited for scholars and students of digital games as well as for narratologists yet to become familiar with this medium

The Gameful World Steffen P. Walz, Sebastian

Deterding, 2015-01-16 What if every part of our everyday life was turned into a game The implications of gamification What if our whole life were turned into a game What sounds like the premise of a science fiction novel is today becoming reality as gamification As more and more organizations practices products and services are infused with elements from games and play to make them more engaging we are witnessing a veritable ludification of culture Yet while some celebrate gamification as a possible answer to mankind's toughest challenges and others condemn it as a marketing ruse the question remains what are the ramifications of this gameful world Can game design energize society and individuals or will algorithmic incentive systems become our new robot overlords In this book more than fifty luminaries from academia and industry examine the key challenges of gamification and the ludification of culture including Ian Bogost John M Carroll Bernie DeKoven Bill Gaver Jane McGonigal Frank Lantz Jesse Schell Kevin Slavin McKenzie Wark and Eric Zimmerman They outline major disciplinary approaches including rhetorics economics psychology and aesthetics tackle issues like exploitation or privacy and survey main application domains such as health education design sustainability or social media
