series is designed to prepare waterworks operators for certification and licensure exams Volume 1 is the only such volume
based on the recently amended Safe Drinking Water Act and provides the tools to understand the microbiological and
chemical hazards of water in light of the quality standards treatment plants must achieve With its clear explanations of basic
math hydraulics electricity and plant processes it prepares the drinking water plant operator for further study of all aspects
of drinking water operations including purification and distribution Abundant cases problems and a full scale battery of
examination questions enable the reader to apply the book's lessons into practice both on the job and in the classroom
Volume 2 is designed to give the experienced operator the means to advance to higher levels Its content has been selected
and organized in accord with SDWA requirements for the continuing education of operators After reviewing basic math this
volume presents information and calculations for critical areas of operator responsibility from intake disinfection and
pumping through odor control and distribution Self check questions and a final examination enable the reader to monitor
progress and prepare for certification and licensure testing Volume 3 is a forthcoming title for the year 2001 and is intended
for advanced operators It represents an in depth treatment of plant processes and operations and stresses troubleshooting
and problem solving Questions and answers are included plus an entire sample test suitable for self study prior to licensure
