Sheth, Steffen Staab, Massimo Paolucci, Diana Maynard, Timothy Finin, Krishnaprasad Thirunarayan, 2008-10-21 The Web is a global information space consisting of linked documents and linked data As the Web continues to grow and new technologies modes of interaction and applications are being developed the task of the Semantic Web is to unlock the power of information available on the Web into a common

semantic information space and to make it available for sharing and processing by automated tools as well as by people. Right now the publication of large datasets on the Web, the opening of data access interfaces and the encoding of the semantics of the data extend the current human-centric Web. Now the Semantic Web community is tackling the challenges of how to create and manage Semantic Web content, how to make Semantic Web applications robust and scalable and how to organize and integrate information from different sources for novel uses. To foster the exchange of ideas and collaboration, the International Semantic Web Conference brings together researchers and practitioners in relevant disciplines such as artificial intelligence, databases, social networks, distributed computing, Web engineering, information systems, natural language processing, soft computing and human-computer interaction. This volume contains the main proceedings of ISWC 2008, which we are cited to offer to the growing community of researchers and practitioners of the Semantic Web. We got a tremendous response to our call for research papers from a truly international community of researchers and practitioners from 41 countries submitting 261 papers. Each paper received an average of 3.

Private Equity Firms Kirsten Burkhardt, 2019-01-14. This work analyzes the role of private equity firms (SCIs) in forming strategic alliances in the French private equity market. The subject is important because the formation of alliances and more generally the networking of SMEs could be an alternative to the lack of medium-sized companies in France. For French SCIs which are increasingly in a competitive situation, assistance in forming alliances for their holdings may represent a new activity and be a source of competitive advantage. The work is positioned transversally, touching the areas of corporate governance, entrepreneurial finance and strategy.

Anonymous Sounds Nessa Johnston, Jamie Sexton, Elodie A. Roy, 2025-01-09. This cross-disciplinary collection provides the first comprehensive study of library music practices in the 1960s and 1970s. Library music was inexpensive off-the-shelf music available to license for a small fee. It was widely used in television and film as a cheaper alternative to commissioned soundtracks. The book pays attention to the different individuals, groups, organisations and institutions involved in making library music as well as to its transnational sites of production from continental recording studios to regional cutting rooms. It addresses questions of distributed creativity, collective authorship and agency. Combining empirical and theoretical research, the book unveils the

modus operandi of a highly secretive yet enduringly significant cultural industry By drawing attention to the cultural ubiquity and intersectionality of library music the collection also shifts emphasis from individual film and TV composers to the invisible community of music publishers writers and session musicians It argues that the latter were collectively responsible for fashioning much of the sonic identity of 1960s and 1970s film and television As well as providing a nuanced understanding of historical library music cultures the collection shows how they continue to inform contemporary audiovisual cultures

Pape,2014-09-02 Sebastian Pape discusses two different scenarios for authentication On the one hand users cannot trust their devices and nevertheless want to be able to do secure authentication On the other hand users may not want to be tracked while their service provider does not want them to share their credentials Many users may not be able to determine whether their device is trustworthy i e it might contain malware One solution is to use visual cryptography for authentication The author generalizes this concept to human decipherable encryption schemes and establishes a relationship to CAPTCHAS He proposes a new security model and presents the first visual encryption scheme which makes use of noise to complicate the adversary's task To prevent service providers from keeping their users under surveillance anonymous credentials may be used However sometimes it is desirable to prevent the users from sharing their credentials The author compares existing approaches based on non transferable anonymous credentials and proposes an approach which combines biometrics and smartcards

Congress. House. Post Office and Civil Service,1972 **A Bride Without a Blessing** David Brodsky,2006 David Brodsky uses form and source criticism to date Massekhet Kallah and the first two chapters of Kallah Rabbati which form a commentary on Massekhet Kallah to the mid amoraic period circa late third and early fifth centuries CE respectively and to

locate their redaction in Babylonia This makes these two sources the only known rabbinic texts whose final redaction took place in Babylonia during the amoraic period and establishes them as the closest extant relatives of the Babylonian Talmud Parallels between these two sources and the Babylonian Talmud elucidate the nature of oral transmission and of the redactional processes of Babylonian rabbinic material during this critical period and thereby of the Babylonian Talmud itself In addition the author deciphers Massekhet Kallah s peculiar asceticism a concern with men s inappropriate use of or interactions with their wives charity vows and even with the group s own transmitted traditions Massekhet Kallah fears the physical and at times cosmic effects of such inappropriate behavior Brodsky finds that these items were all deemed consecrated removed from the realm of normal interaction To have mundane interaction with them was a powerful and dangerous act Brodsky explores the fascinating gender and theological implications of this unique asceticism *Summary of World Broadcasts* British Broadcasting Corporation.
