*California Landscape* Mary Hill, 2023-12-22 Discover the captivating story behind California's breathtaking landscapes in *California Landscape Origin and Evolution*. This engaging exploration unravels the powerful forces that have shaped the Golden State from its towering mountains and dramatic coastlines to its deserts and valleys. California's natural diversity is unparalleled within its borders; lies the highest peak and the lowest point in the contiguous U.S., the driest desert and the wettest mountain. In this book, Mary Hill reveals how volcanoes, earthquakes, and the relentless movement of Earth's tectonic plates have sculpted the land over millions of years. Learn how molten rock from deep within the Earth formed towering peaks while the shifting of tectonic plates lifted mountains and transformed ancient seabeds into lofty summits. Even today, California's mountains continue to grow, shaped by the very same forces that built them. The story doesn't end with the creation of these majestic landscapes. Water in all its forms—rushing rivers, pounding surf, and even ancient glaciers—has played a crucial role in carving the iconic scenery we know and love. From serene lakes to rugged cliffs, these natural artists have sculpted California's land over time, creating its stunning diversity. Perfect for geology enthusiasts, nature lovers, and anyone fascinated by the dynamic beauty of California, *California Landscape Origin and Evolution* provides a rich and accessible look at the ongoing processes that continue to shape this ever-changing state. Dive into the forces of nature that made California what it is today and what it may become tomorrow. This title is part of UC Press's Voices Revived program, which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice, reach, and impact. *A Natural History of California* Allan A. Schoenherr, 2017-07-03 In this comprehensive and abundantly illustrated book, Allan A. Schoenherr describes the natural history of California, a state with a greater range of landforms, a greater variety of habitats, and more kinds of plants and animals than any area of equivalent size in all of North America. *A Natural History of California* focuses on each distinctive region, addressing its climate, rocks, soil, plants, and animals. The second edition of this classic work features updated species names and taxa, new details about parks reclassified by federal and state agencies, new stories about modern human and animal interaction, and a new epilogue on the impacts of climate change.

*Historic Aircraft Wrecks of San Bernardino County* G. Pat Macha, 2013-09-24 Weather, darkness, and twists of fate have contributed to more than three hundred airplane crashes in San Bernardino County, California. Many of these accidents occurred in the vast Mojave Desert; others on the cloud-shrouded, snow-capped mountains of the largest county in the lower forty-eight states. Searches often were labored yet fruitless, even for the privileged. Frank Sinatra's mother perished here in a downed plane. The quest for an aircraft containing \$5,000 in cash has become the stuff of legend. Tales of survival in uninhabited, rugged landscapes have been especially harrowing. Join renowned aircraft crash search specialist G. Pat Macha for dozens of sorrowful, triumphant
