Sustainable Development For Public Administration:

Sustainable Development for Public Administration John R. Bartle, Deniz Zeynep Leuenberger, 2014-12-18 This groundbreaking text focuses on the application of sustainability and sustainable development theories to public administration practice. It is designed to guide planning, resource management and outcomes measurement for future and current non-profit and public managers. The book introduces sustainable development and related theories, ties these theories to public administration practice and elaborates on applications to specific PA specializations including energy management, transportation, water waste management, urban development, wildlife conservation and higher education. It also includes a chapter specifically geared to outcome measurement of sustainability goals in public and non-profit agencies.

Sustainable Development for Public Administration Caroline Covell, 2016 Reinventing the government was big in the early 1980s, post media presentation that echoed how inefficient the government has been. Ever since the government went through different reorganization processes through the application of different modern management theories endorsed by the politicians such as the Hawthorne theory, the Gantt Theory, Mintzberg Management Theory, Theory X and Y and the Agency Theory, all promise efficient government. However, Ghoshal argued that all these modern management theories are bad theories and they have destroyed the good management practice of a public institution. They were implemented as a trial and error, one fails, try another. As a result, the management system is destroyed. Its administrative system is broken. The organization is becoming dysfunctional and it causes a badly divided government. This damaged system makes it easy for theft, fraud, corruption, bribery, grafts, sabotage, espionage and all kinds of illegal practices. At the same time, the change causes the used to be a professional public institution to become an amateur corporation that is individually managed, personally ruled and undemocratic governance. This paper discusses the theoretical foundation of the bureaucracy and its analysis and once this theory is applied in the administrative system of government, it shows how this damage can be remedied theoretically and applicably.
