Institutional Arrangements for Conservation, Development and Tourism in Eastern and Southern Africa René van der Duim, Machiel Lamers, Jakomijn van Wijk, 2014-11-16. This book presents an overview of different institutional arrangements for tourism, biodiversity conservation and rural poverty reduction in eastern and southern Africa. These approaches range from conservancies in Namibia, community based organizations in Botswana, conservation enterprises in Kenya, private game reserves in South Africa to sport hunting in Uganda and transfrontier conservation areas. The book presents a comparative analysis of these arrangements and highlights that most arrangements emerged in the 1990s through either a decentralized or centralized change trajectory that was sponsored by donors. They aim to address some of the challenges of the fortress types of conservation by combining

principles of community based natural resource management with a neoliberal approach to conservation evident in the use of tourism as the main mechanism for accruing benefits from wildlife The book illustrates the empirical relevance of these novel arrangements by presenting their growth in numbers and discuss how these arrangements differ in their form With respect to the conservation and development impacts of these arrangements we show that they have secured large amounts of land for conservation but also generated governance challenges and disputes on tourism benefit sharing affecting the stability of these arrangements to generate socioeconomic and conservation benefits Sustainable Development Policy Michael von Hauß, Claudia Kuhnke, 2017-04-21 Sustainable Development Policy A European Perspective uses a variety of multidisciplinary perspectives to explore the ways in which sustainable infrastructures can play a more prominent and effective role in international development policy Building on a solid introduction to sustainability and development policy this book discusses ways in which viable reform can be promoted through coherent governing the design of social security systems education systems and the possibilities of fair trade as an alternative trading concept Sustainable Development Policy generates a platform on which to encourage constructive dialogue on issues surrounding sustainability in the wake of the global scarcity of natural and economic resources This edited collection will be of great interest to all students and lecturers of development studies and development policy as well as researchers from other disciplines looking for an introduction to sustainable development policy and its practical applications **Sustainable Tourism in the Americas** Edward W.
