Leutz,Akio Suzuki,2012-12-06 Nonimaging Fresnel Lenses Design and Performance of Solar Concentrators what are we
talking about It is easy to forget that you dear reader may not be one of those who work in exactly the same field as we do
nonimaging optics for the concentration of sunlight You may be a researcher in some optical science interested in the core
subject of this book the world's first practical design of a nonimaging Fresnel lens concentrator You may not be too excited
about the collection of solar energy but you would want a full description of the optical performance of the lens Which you
will get mostly in terms of nonimaging optics complete with test results and set against the competition of imaging Fresnel
lenses and mirror based imaging and nonimaging concentrators If you are a solar energy professional you are likely to be
interested in reading why nonimaging optics and solar energy collection go together so well They do so because the
concentration of solar energy does not demand imaging qualities but instead requires flexible designs of highly uniform flux
concentrators coping with solar disk size solar spectrum and tracking errors Nonimaging optics has been developed to
perfection since its discovery in 1965 in dealing with solar power conversion Much of this experience is useful in nonimaging
optical design in other fields where the markets already are more rewarding than in solar power generation such as
