Research Methods for Nursing and Healthcare John Maltby, Glenn Williams, Julie McGarry, Liz Day, 2014-02-04 Research Methods for Nursing and Healthcare is an essential introductory text for all nursing and healthcare students coming to research methods for the first time or those nurses and healthcare staff wishing to improve their skills in this area. The book includes comprehensive coverage of the main research methods topics and provides guidance on how to understand and apply research techniques. Everyday nursing examples are used throughout to explain research methods concepts and their relevance to practice. Simple self assessment tasks are included at the end of chapters the tests can be undertaken individually or within groups to assess the students understanding of the concepts and skills being learnt. Research Methods for Nursing and Healthcare takes the fear out of research methods for all nursing and healthcare professionals. Excellent introductory text that brings interest to research methods for student nurses. Dr Aimee Aubeeluck Deputy Director Graduate Entry Nursing School of Nursing Midwifery and Physiotherapy University of Nottingham. I think this is one of the most readable books on research I have read. Not the most scholarly but that was not the intention. It is

certainly the most user friendly book that will make the whole often scary subject of research less threatening Paula Crick Principal Lecturer Faculty of Health Staffordshire University I do think this is one of the most engaging texts aimed at nursing that I have read in a while This does seem much more exciting and more importantly real world Lucy Land Senior Academic Centre for Health and Social Care Research Faculty of Health Birmingham City University Useful resource for our students dissertation which can be a literature review or a research proposal Melanie Brooke Read Department of Health Social Studies University of Bedfordshire Excellent text book which actually takes away the fear of research within healthcare Angela Cobbold Institute of Health Social Care Anglia Ruskin University The text is very comprehensive and I found chapter 7 on action research particularly useful in supporting a student I was supervising I also like the self assessment exercises which I intend to incorporate in my teaching strategy Ms Mulcahy School of Nursing and Midwifery University College Cork

COVID-19 Pandemic and the Social Determinants of Health Rosemary M. Caron,Ronica Nicole Rooks,Stefania Salmaso,Mahmoud Kandeel,2024-07-15 The COVID 19 pandemic has disproportionately affected those population sectors that experience inequality Specifically marginalized racial and ethnic populations with pre existing health conditions those living in poverty those possessing a low education level hourly wage employees etc have experienced an excess burden of COVID 19 morbidity and mortality compared to their White counterparts in developed countries The interaction of the social determinants of health with a novel virus has made visible the inequities that have been hidden or accustomed to in many communities globally As we work to end the current pandemic we must consider the post COVID 19 pandemic era and address the social determinants of health so that populations start from a place of health as opposed to a place of disease for the next public health challenge Syndemic research has demonstrated the interaction among socio cultural factors socio economic factors structural factors and individual factors collectively referred to as the social determinants of health and infectious disease epidemics e g COVID 19 AIDS and social epidemics e g structural racism These interactions can exacerbate and sustain adverse health outcomes for marginalized populations How can communities improve the social determinants of health for impoverished populations The importance of doing so would have implications not only for the health status of communities but could also improve economic conditions for these geographic areas Addressing the social determinants of health for marginalized populations has the potential to improve health for all
