financial statements and improving the drawbacks of existing methods this book proposes a bank risk aggregation framework based on financial statements It makes full use of information recorded in financial statements including income statement on and off balance sheet assets and textual risk disclosures which solves the problem of data shortage in bank risk aggregation to some extent and improves the reliability and rationality of bank risk aggregation results This book not only improves the theoretical studies of bank risk aggregation but also provides an important support for the capital allocation of the banking industry in practice Thus this book has theoretical and practical importance for bank managers and researchers of bank risk management

*Developing a Keyword Extractor and Document Classifier: Emerging Research and Opportunities* Paul, Dimple Valayil, 2021-01-08 The main problems that prevent fast and high quality document processing in electronic document management systems are insufficient and unstructured information information redundancy and the presence of large amounts of undesirable user information The human factor has a significant impact on the efficiency of document search An average user is not aware of the advanced option of a query language and uses typical queries Development of a specialized software toolkit intended for information systems and electronic document management systems can be an effective solution of the tasks listed above Such toolkits should be based on the means and methods of automatic keyword extraction and text classification The categorization or classification of texts into predefined categories has witnessed a booming interest in the last 10 years due to the increased availability of documents in digital form and the ensuing need to organize them Thus research on keyword extraction advancements in the field and possible future solutions is of great importance in current times *Developing a Keyword Extractor and Document Classifier: Emerging Research and Opportunities* presents an information extraction mechanism that can process many kinds of inputs realize the type of text and understand the percentage of the keywords that has to be stored This mechanism then supports information extraction and information categorization mechanisms This module is used to support a text summarization mechanism which leads with the help of the keyword extraction module to text categorization It employs lexical and information retrieval techniques to extract phrases from the document text that are likely to characterize it and determines the category of the retrieved text to present a summary to the users This book is ideal for practitioners stakeholders researchers academicians and students who are interested in the development of a new keyword extractor and document classifier method      *C++ Questions and Answers PDF* Arshad Iqbal, *The C Quiz Questions and Answers PDF* C Competitive Exam Questions Chapter 1 19 Practice Tests Class 8 12 C Textbook Questions for Beginners includes revision guide for problem solving with hundreds of solved questions C
