Test Bank Questions For Dosage Calculations:

Clinical Dosage Calculations Vanessa Brotto, Kate Rafferty, 2019-11-18 Clinical Dosage Calculations is a locally written full colour text covering the important aspects of dosage calculations that students require to perform this essential part of clinical practice. An applied skills focused text, Brotto uses real life cases, worked examples and real medication charts and labels to engage students. Using a scaffolded approach to learning, the text starts with fundamental maths and familiarises students with medication charts and labels, then moves on to specialist area chapters allowing learners to deepen their skills in a clinical context. Students engage in the activities of each chapter as an introduction to the concept before moving onto the final chapter where they can test their overall knowledge. Clinical Dosage Calculations 4e, 2024-10-01 Clinical Dosage Calculations 4e by Brotto and Rafferty is a practical, portable reference for nursing students. This text covers the basic mathematics and essential knowledge and skills to undertake the safe and accurate calculation of medication administration. Clinical Dosage Calculations is designed with an incremental scaffolded approach to learning and mastering numeracy from basic arithmetic to more specialised calculations. It helps students deal with this vital part of clinical practice by using real life cases, worked examples and actual drug charts and medication labels, providing students with context for the challenging task of calculating the correct dose to administer to patients.
