Cizek, 2012-03-22 Setting standards of performance is a ubiquitous task in education licensure certification and credentialing It is found in elementary schooling the professions commercial applications and governmental and private organizations It is one of the most complex controversial and vexing issues facing specialists and policy makers today This second edition solidifies Setting Performance Standards as the only book providing a comprehensive profile of both the issues and the how to methods that define this thorny field Four chapters have been removed 11 chapters have been added 2 chapters have major revisions and all chapters have been updated Comprehensive Part I provides a conceptual overview of standard setting and its overarching issues Part II provides practical how to information on the newest standard setting methods Part III provides information and advice on persistent and potential challenges in standard setting Practical Part II the heart of the book reviews 16 of the newest standard setting methods far more than any other book Expertise Most of the well known authors from the 1st edition return with authors of equal stature contributing new chapters With Literacy and Justice for All Carole Edelsky, 2006 The third edition of With

Literacy and Justice for All Rethinking the Social in Language and Education continues to document Carole Edelsky's long involvement with socially critical holistic approaches to the everyday problems and possibilities facing teachers of language and literacy. This book helps education professionals understand the educational societal situations they are dealing with and literacy instruction and second language learning in particular contexts. Edelsky does not offer simplistic pedagogical formulas but rather progressively works through differences and tensions in the discourses and practices of sociolinguistics, bilingual education, whole language, and critical pedagogy fields whose practitioners and advocates too often work in isolation from each other and at times at cross purposes. In this edition, what Edelsky means by rethinking is improving and extending her own views while at the same time demonstrating that such rethinking always occurs in the light of history. The volume includes a completely new Introduction and two entirely new chapters: one on reconceptualizing literacy learning as second language learning and another on taking a historical view of responses to standardized testing. Throughout in updating the volume, Edelsky uses a variety of structural styles to note contrasts in her views across time and to make the distinction clear between the original material and the current additions. This edition is a rare example of a scholar owning up to changes in thinking and a much needed demonstration of the historically grounded nature of knowledge. As a whole, the third edition emphasizes recursiveness and questioning within a deliberately political framework.
