sequences for some calculations Look at it and you instantly know how to do it it's that simple Lots of screenshots to give you real examples This book is your perfect buddy for these calculator models TI 84 Plus C TI 84 Plus C Silver Edition TI 84 Plus CE These calculators have a color display If you have an older calculator with a black and white display like the TI 84 Plus or TI 83 Plus this book is not for you However I have written another book just for the older calculators I decided to write two books so I can show you exactly the right screenshots and keys that apply to the individual calculator model you have most other books just use a similar calculator to make one book for all models About the Author My name is Marco and I graduated from high school in 2013 I was quite good at mathematics and often helped my classmates to understand it better especially how to use their calculators It just has been a few years since I was using the TI 84 Plus myself Therefore I know how students think and what they need I know they don't need a book with more than 300 pages to understand a graphing calculator While writing my book I kept in mind that it should be simple to understand and as short as possible so as not to confuse students with too much background information Besides that I remembered that even if I previously knew how something worked I often forgot the keystroke to do it So I created simple step by step keystroke sequences for most commands and calculations which makes it so easy to look them up and instantly be able to do it with no need to read through a long text After I graduated I developed an app that teaches how to use the TI 84 Plus CE My app is helping a lot of students use their calculators and is frequently ranked in the Top 10 Education USA on iOS and Android Visit <http://www.ti84calculator.com/manualCE> for more information
