Writing at the State U Emily Isaacs, 2018-02-21 Writing at the State U presents a comprehensive empirical examination of writing programs at 106 universities. Rather than using open survey calls and self-reporting, Emily Isaacs uses statistical analysis to show the extent to which established principles of writing instruction and administration have been implemented at state comprehensive universities, the ways in which writing at those institutions has differed from writing at other institutions over time, and how state institutions have responded to major scholarly debates concerning first-year composition and writing program administration. Isaacs's findings are surprising: state university writing programs give lip service to important principles of writing research but many still emphasize grammar instruction and a skills-based approach. Classes continue to be outsized, faculty development is optional, and orientation toward basic writing is generally remedial. As such, she considers where a closer match between writing research and writing instruction might help to expose and remedy these difficulties and identifies strategies and areas where faculty or writing program administrators are empowered to enact change. Unique in its wide scope and methodology, *Writing at the State U* sheds much-needed light on the true state of the writing discipline at state universities and demonstrates the advantages of more frequent and rigorous quantitative studies of the field.

Texas State Journal of Medicine, 1909 **Registry of Higher Education Reform**, Botany James D. Mauseth, 2014 As new information is introduced and environmental changes occur, Plant Biology continues to develop and evolve as a science. Updated and revised to keep pace with these developments, the Fifth Edition of *Botany: An Introduction to Plant Biology* provides a modern and comprehensive overview of the fundamentals of botany while retaining the important focus of natural selection, analysis of botanical phenomena, and diversity. Students are first introduced to topics that should be most familiar, plant structure, proceed to those less familiar, plant physiology and development, and conclude with topics that are likely least familiar to the introductory student, genetics, evolution, and ecology. Mauseth is sure to provide the latest material on molecular biology and plant biotechnology in an effort to keep pace with these advancing areas of study. All sections are written to be self-contained, allowing for a flexible presentation of course material. Key Features: Includes new content on molecular biology, plant biotechnology, and the most recent coverage of taxonomy and phylogeny of plants. Now available with a new electronic laboratory manual. *Plants Do Things Differently* boxes help students understand and compare plant biology with human biology. End-of-chapter study guide includes nearly 50 or more questions in each chapter, urging students to test themselves on the most important points in the chapter. *Alternatives* boxes encourage students to think expansively about alternative aspects of plant biology that are more advantageous in certain conditions. *Handbook for Teaching Introductory Psychology* Michelle Rae Hebl, Charles L. Brewer, Ludy T. Benjamin, Jr., 2001-08-01 Like its predecessors, Volume III of the *Handbook for Teaching Introductory Psychology* provides introductory psychology instructors with teaching ideas and activities that can immediately be put into practice in the classroom. It contains an organized

collection of articles from Teaching of Psychology TOP the official journal of the Society for the Teaching of Psychology Division 2 of the American Psychological Association Volume III contains 89 articles from TOP that have not been included in other volumes Another distinction between this volume and its predecessors is its emphasis on testing and assessment The book is divided into two sections Section One Issues and Approaches in Teaching Introductory Psychology contains 52 articles on critical issues such as how to approach the course understanding students interests perceptions and motives students existing knowledge of psychology including their misconceptions a comparison of introductory textbooks and tips on how to evaluate them test questions and student factors affecting exam performance an overview of different forms of feedback giving extra credit and how to deal with academic dishonesty Section Two consists of 37 articles that present demonstrations class and laboratory projects and other techniques to enhance teaching and learning in both the introductory as well as advanced courses in the discipline This section is organized so as to parallel the order of topics found in most introductory psychology textbooks Intended for academicians who teach the introductory psychology course and or oversee grad assistants who teach the course all royalties of the book go directly to the Society for the Teaching of Psychology to promote its activities to further improve the teaching of psychology
