State/Federal Regulations

- Wildlife rehabilitation: treatment and temporary care of injured, diseased, orphaned, and displaced indigenous animals, and subsequent release of healthy animals to appropriate habitats
- Wildlife rehabilitation facility/center: location at which wildlife rehab is conducted; nature centers, humane societies, vet clinics, universities, etc.
- Inform Department of Environmental Conservation Special Licensing Unit within 48 hours/ASAP if in receipt of an endangered or federally-regulated species. State and federal threatened/endangered species lists are maintained separately and updated periodically and are thus different.
- CWR license is to legally care to sick, injured, orphaned, or displaced animals with the intent to return them to the wild ASAP. Vets can only treat wildlife in acute stages of distress. They must hand them over to WRs for rehab and release unless vet is a sub-permittee. WRs may transfer raptors to a licensed WR or falconer as part of the rehabilitation/reconditioning process. WRs may capture, house, feed, provide emergency treatment, release animals, and educate the public. WRs may not trap nuisance animals (that falls under the jurisdiction of animal control).
- State licenses allow treatment of non-federally-protected wildlife such as European starlings, pigeons, dove, turkeys, house sparrows, pheasants, ruffed grouse, etc. A federal Special Purpose License is required to care for endangered species, migratory species (song birds, hawks, ducks), and marine species. You can accept the animals but cannot treat them/must report them ASAP. Rabies Vector Species (RVS) licenses are required to treat RVS such as bats, skunks, and raccoons.
- It is illegal for residents to possess birds/nests/eggs of endangered migratory birds (Migratory Bird Treaty Act), so in special circumstances, the government may allow WR to relocate the nest. If poisoning or other criminal activity suspected, dead or alive, report to FWS Law Enforcement Office ASAP.
- Educational/exhibit animals require a separate license: non-endangered "Collect & Possess" and USDA Exhibition License. If an animal dies in rehab, options include giving it to a museum or other educational institution with proper permits according to local ordinance. Options for non-releasable animals include foster parenting or captive breeding. Long-term captive animals have different standards of care than rehabilitative standards.
- Wildlife rehabilitators run 501(c)(3)s, so you can accept donations, but never bill for services. If moving, you must report it within 5 days. Class 2 WRs can train/oversee 1-2 assistant WRs with approval. Class 1 WRs must practice for 2 years to apply to Class 2 level. All WRs consult with licensed vets and network with one another for best results. You must display license in your center or on you when in the field in possession of wildlife. Conduct regular self-evaluations.
- Recording/reporting requirements: formats may vary. Records can be consolidated for healthy litters/clutches raised for release. Daily forms for animal by enclosure are required to verify food, meds, and care are provided. Annual submission of Log & Tally activity report by December 1 (though deadline is dependent on state) with lists/info.
